MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE  
**RAJYA SABHA**  
**UNSTARRED QUESTION NO. 681**  
TO BE ANSWERED ON 17.12.2018

**Abatement of pollution in rivers**

681. KUMARI SELJA:

Will the Minister of ENVIRONMENT, FOREST AND CLIMATE CHANGE be pleased to state:

- (a) the details of the most polluted rivers in the country, State-wise;
- (b) the major reasons for the pollution in the rivers in the last three years;
- (c) steps taken by Government to curb and decrease pollution in the water bodies and the rivers in the country; and
- (d) whether Government has implemented the guidelines given under the National River Conservation Plan and if so, the details and results thereof?

**ANSWER**

MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE (DR. MAHESH SHARMA)

(a) & (b) Pollution load in rivers has increased over the years due to rapid urbanization and industrialization. Rivers in the country are mainly polluted due to discharge of untreated and partially treated sewage from cities/towns and industrial effluents. Central Pollution Control Board (CPCB) in association with the State Pollution Control Boards monitors the water quality of rivers across the country through a network of monitoring stations under the National Water Quality Monitoring Programme. As per the report published by CPCB in September 2018, 351 polluted river stretches have been identified on 323 rivers based on Bio-chemical Oxygen Demand (BOD) levels, a key indicator of organic pollution. The State-wise details of identified polluted river stretches are at *Annexure*.

(c) Pollution abatement of rivers and water bodies is a continuous and ongoing process. It is the responsibility of the State Governments/ concerned local bodies to set up facilities for collection, transportation and treatment of sewage being generated and ensure that untreated sewage does not fall into the rivers & water bodies, thereby polluting them. This Ministry has been supplementing the efforts of the State Governments in abatement of pollution in identified stretches of various rivers under the scheme of National River Conservation Plan (NRCP) and conservation & management of lakes & wetlands under a separate scheme of National Plan for Conservation of Aquatic Eco-systems (NPCA), on a cost sharing basis between the Central and State Governments.

NRCP {excluding Ganga and its tributaries, which are handled by Ministry of Water Resources, River Development & Ganga Rejuvenation (MoWR,RD&GR) from 01/08/2014 onwards} has so far covered polluted stretches of 33 rivers in 76 towns spread over 15 States in the country at a sanctioned cost of Rs. 4801.57 crore, and Central share of Rs. 2337.73 crore has been released to the State Governments for implementation of various pollution abatement schemes. Sewage treatment capacity of 2520.43 mld (million litres per day) has been created so far under the NRCP. NPCA has so far covered 150 identified wetlands and lakes in 24 States & 1 Union Territory and Central share of Rs. 936.41 crore has been released so far to the State Governments for conservation of lakes & wetlands.

State Governments, apart from their own budgetary allocation, are also accessing financial assistance for creation of sewerage infrastructure, including Sewage Treatment Plants (STPs), in various cities/towns under Atal Mission for Rejuvenation and Urban Transformation (AMRUT) and Smart Cities Mission of Ministry of Housing & Urban Affairs as well as Namami Gange programme of Ministry of Water Resources, River Development & Ganga Rejuvenation (MoWR,RD&GR).

To ensure proper treatment of municipal wastewater before discharge into the rivers, CPCB has issued directions under Section 18 1(b) of the Water (Prevention and Control of Pollution) Act, 1974 in April, 2015 to all the State Pollution Control Boards (SPCBs)/Pollution Control Committees (PCCs) in the country for setting up of STPs in their respective States. CPCB has also issued directions in October, 2015 to municipal authorities of 66 metropolitan cities and State capitals under Section 5 of the Environment (Protection) Act, 1986 to ensure proper treatment and disposal of sewage generated for abatement of pollution of rivers.

Further, to control discharge of industrial effluents, CPCB and respective SPCBs/PCCs monitor industries with respect to effluent discharge standards and take action for non-compliance under the Water (Prevention and Control of Pollution) Act, 1974 and the Environment (Protection) Act, 1986. To improve the monitoring of compliance, directions have been issued by CPCB to specific industries to install online 24x7 effluent monitoring systems. Steps have also been taken by CPCB to promote low waste concept in grossly water polluting industries, particularly those located on the river banks.

(d) The Ministry has formulated guidelines for submitting project proposals for funding under NRCP. Project proposals are received from the State Governments from time to time for taking up pollution abatement works in towns along various rivers, and are considered for financial assistance under NRCP subject to their conformity with the NRCP guidelines, pollution status, prioritization, appraisal by independent institutions and availability of Plan funds. The projects under NRCP are funded on cost sharing basis between the Central and State Governments as per the guidelines.
