THE MINISTER OF ROAD TRANSPORT AND HIGHWAYS

(SHRI NITIN JAIRAM GADKARI)

(b) & (c) Yes sir. Detailed investigation about quality of construction of the National Highway-62 was entrusted to Central Road Research Institute (CRRI) by NHAI. CRRI conducted detailed investigation on the stretch and observed that the pavement had developed potholes, stripping, raveling, rutting, cracks as well as settlement in the considerable length. Accordingly, CRRI suggested for relaying and micro surfacing in the bituminous/ surface layer based on the magnitude of distresses. Concessionaire had completed all the treatment works as suggested by CRRI.
