

GOVERNMENT OF INDIA  
MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

**RAJYA SABHA**  
**UNSTARRED QUESTION NO. 1787**  
TO BE ANSWERED ON 16.03.2023

**Polluted stretches in India's River**

1787. SHRI DIGVIJAYA SINGH

Will the Minister of ENVIRONMENT, FOREST AND CLIMATE CHANGE be pleased to state:

- (a) number of polluted stretches in India's rivers between 2017-18 and 2022-23, State-wise;
- (b) whether according to report of Central Pollution Control Board (CPCB), the number of most polluted stretches in Indian rivers has been practically unchanged since 2018, if so, the details thereof and reasons therefor;
- (c) details of most polluted stretches in 2022-23, State-wise, river-wise and category-wise;
- (d) whether Gujarat and Uttar Pradesh have the maximum number of 'Priority 1' (most polluted) river stretches, if so, the details thereof and reason therefor; and
- (e) the steps being taken by Government to control organic pollution?

**ANSWER**

MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE  
(SHRI ASHWINI KUMAR CHOUBEY)

(a)  
The number of polluted river stretches have reduced from 351 identified in year 2018 to 311 in year 2022. The State wise number of polluted river stretches identified in year 2015, 2018 and 2022 are given in **Annexure I**.

(b) & (c)

During the Year 2018, 351 polluted river stretches were identified on 323 rivers based on exceedance of Bathing Water Quality Criteria parameter of BOD (exceeding 3 mg/L), by analysis of water quality data of rivers for the years 2016 and 2017. Subsequently, in year 2022, CPCB has identified 311 polluted river stretches on 279 rivers in the country, on the basis of same criteria by analysis of water quality data of rivers for the years 2019 and 2021. Accordingly, the State wise list of 108 river stretches with no change in water quality observed during the year 2018 & 2022 is given in **Annexure II**. The State wise details of polluted river stretches identified in year 2022 are given in **Annexure III**.

(d) & (e)

Out of 46 Polluted River stretches (PRS) identified in Priority Class – I in 18 States/ UTs, highest number of PRS are identified in Gujarat & Uttar Pradesh (6 each) followed by in Himachal Pradesh, Maharashtra & Tamil Nadu (4 each); Karnataka & Punjab (3 each); Haryana, Madhya Pradesh, Meghalaya, Rajasthan & Uttarakhand (2 each) and 1 each in Telangana, Andhra Pradesh, Assam, Delhi, West Bengal and Odisha.

The pollution in rivers and other water bodies is increasing in urban centers mainly due to rapid increase in population and resultant wastewater generation. The development of wastewater treatment facility is not commensurate with the increasing wastewater generation in urban centers and lean flow in rivers for a large part of the year after a short span of monsoon period.

For rejuvenation of polluted river stretches identified by CPCB during the year 2018, action plans were prepared by four-member Committee called “River Rejuvenation Committee” (RRC) constituted by the respective State Government/ UT Administration, under the overall supervision and coordination of Principal Secretary, Environment of the concerned State /Union Territory for bringing all the polluted river stretches identified by CPCB fit for bathing purposes (i.e. BOD < 3 mg/L and FC < 500 MPN/100 mL).

Implementation of time-bound action plans have been assigned to State Government Departments/ UT Administration Departments and are responsible for rejuvenation of polluted river stretches identified in the respective State/UT under the overall supervision and coordination of Principal Secretary, Environment of the concerned State/Union Territory. Overall responsibility lies with the Chief Secretary, State Governments/UT Administrations. Progress of implementation of action plans is reviewed by the RRC at State Level and Central Monitoring Committee (CMC) constituted under the Chairmanship of Secretary, Ministry of Jal Shakti at Central Level.

Further, Government of India has enacted The Water (Prevention and Control of Pollution) Act, 1974 and The Environment (Protection) Act, 1986 for protection of water bodies and the Central & State Pollution Control Boards are implementing various provisions of above mentioned Pollution Control Acts/ Rules to prevent and control pollution of aquatic resources.

\*\*\*

## Annexure I

## State wise number of polluted river stretches identified in year 2015, 2018 and 2022

State/UT	2022	2018	2015
