- (d) if so, the details thereof and if not, the reasons therefor?

ANSWER

MINISTER OF AGRICULTURE AND FARMERS WELFARE

(SHRI ARJUN MUNDA)

(a) to (d) Unified Farmer Service Interface (UFSI) is the foundational block of Agri Stack that enables interoperability of the various IT systems and databases generated in AgriStack i.e. Farmer registry, Geo-referenced village map registry and crop-sown registry. It comprises of a centrally defined data schema, definitions of set of APIs, and associated rules, call sequences and error codes. The UFSI is ready and consists of the components of Application programming interface (API) Specifications, Network Manager, Access Manager and APIs for network participants. At present, one district each in six states have been taken for the pilots for creation of unique ID.
