

GOVERNMENT OF INDIA
MINISTRY OF TRIBAL AFFAIRS
RAJYA SABHA
STARRED QUESTION NO- *113
TO BE ANSWERED ON-10/12/2025

SWASTHYA PORTAL

113. DR. MEDHA VISHRAM KULKARNI:

Will the Minister of TRIBAL AFFAIRS be pleased to state:

- (a) the present status of the Swasthya Portal and the number of States/ UTs and tribal districts currently uploading real-time health data;
- (b) whether any assessment has been conducted on its usage, outreach and effectiveness for evidence-based planning in tribal health, if so, the details thereof;
- (c) the volume and categories of data, research briefs, case studies and best practices added during last three years;
- (d) whether the Ministry plans to expand the portal to integrate national health databases, district dashboards or AI-enabled analytics; and
- (e) if so, the details thereof?

ANSWER

MINISTER OF TRIBAL AFFAIRS
(SHRI JUAL ORAM)

(a) to (e): A statement is laid on the table of the House.

**STATEMENT REFERRED TO IN REPLY TO PARTS (A) TO (E) OF RAJYA SABHA
STARRED QUESTION NO. 113 FOR ANSWER ON 10.12.2025 RAISED BY DR. MEDHA
VISHRAM KULKARNI REGARDING “SWASTHYA PORTAL”.**

(a) to (e): Swasthya Portal for purpose of tribal health repository on the basis of secondary data was developed under the central sector scheme “Tribal Research Information Education Communication and Events (TRI ECE)” of Ministry of Tribal Affairs. The portal is hosted on the National Informatics Centre (NIC) Server and accessed on <https://swasthya.tribal.gov.in/home>. Real-time health data by the districts is not being uploaded on the portal. Public Health being a state subject, the primary responsibility to provide accessible, affordable and quality health care services to the people including tribal population lies with State/UT Governments. However, surveys like National Family Health Survey (NFHS), and District Level Household Survey (DLHS), conducted by the Ministry of Health and Family Welfare give estimates inter-alia for tribal health indicators. No specific assessment was conducted by the Ministry on portal usage, outreach and effectiveness. Also, at present there are no plans to expand the portal to integrate national health databases, district dashboards or AI-enabled analytics.
