UNSTARRED QUESTION NO. 1017
ANSWERED ON 09/02/2026**

COMPREHENSIVE MOBILITY PLANNING IN JAMMU

1017. SHRI SAT PAUL SHARMA:

Will the Minister of HOUSING AND URBAN AFFAIRS be pleased to state:

- (a) the current status of implementation of the Comprehensive Mobility Plan (CMP) for Jammu city, including key objectives and phases approved under the Plan;
- (b) the details of timelines prescribed for completion of these components, along with the total financial outlay approved and expenditure incurred so far under the CMP;
- (c) whether Government has identified any bottlenecks relating to last-mile connectivity and integration of road-widening projects with public transport planning; and
- (d) if so, the details thereof and the proposed roadmap for mitigating the same?

ANSWER

**THE MINISTER OF STATE IN THE MINISTRY OF HOUSING AND URBAN AFFAIRS
(SHRI TOKHAN SAHU)**

(a) to d): Urban Transport, which is an integral part of urban development, is a State subject. Hence respective State /Union Territory Government is responsible for planning initiation of development of urban transport infrastructure projects including planning of last mile connectivity etc. and their integration & completion.

Comprehensive Mobility Plan (CMP) is a planning framework based on which projects are conceptualised by concerned State /Union Territory Government and timelines and financial outlay is specific to individual projects, which are subject to feasibility of proposals and availability of resources. Government of Jammu & Kashmir has informed that CMP for Jammu City has been prepared as a long term integrated urban transport framework with the objectives of promoting sustainable public transport, reducing congestion and emissions, improving road safety, ensuring multimodal integration and Transit-Oriented Development. The CMP envisages implementation in different phases. Details are attached in **Annexure**.

Central Government has sanctioned 100 buses under PM eBus Sewa Scheme to strengthen urban mobility for the city of Jammu.

Phases	Components
Phase-I (Short term)	Traffic management, bus system strengthening, junction improvements and Non-motorised transport facilities.
Phase-II (Medium term)	Development of high-capacity public transport corridors, feeder services and Intelligent Transport Systems (ITS).
Phase-III (Long term)	Implementation of Mass Rapid Transit system and multimodal integration.
