

**GOVERNMENT OF INDIA  
MINISTRY OF HEALTH AND FAMILY WELFARE  
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**RAJYA SABHA  
UNSTARRED QUESTION NO. 2038  
TO BE ANSWERED ON 10<sup>TH</sup> MARCH, 2026**

**DELAY IN ACHIEVING TB ELIMINATION TARGETS**

**2038 SHRI RANDEEP SINGH SURJEWALA:**

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) whether Government takes cognizance that India accounts for nearly 25 per cent of the global tuberculosis burden despite a 21 per cent decline between 2015–2024 and the reasons for not meeting the 2025 national TB elimination target;
- (b) the measures taken to address India's high TB share in 2024 -2025 and whether drug shortages, treatment discontinuation or diagnostic delays have been recorded or audited; and
- (c) the State-wise availability and stock-out record of essential MDR-TB drugs and rapid molecular diagnostic kits since 2022 and whether rural and aspirational districts face diagnostic or treatment delays?

**ANSWER**

**THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE  
(SMT. ANUPRIYA PATEL)**

(a) to (c) As per the World Health Organization's Global TB Report 2025, the annual TB incidence rate has declined by 21% from 237 cases per lakh population in 2015 to 187 cases per lakh population in 2024 and the mortality rate has declined by 25% from 28 deaths per lakh population in 2015 to 21 deaths per lakh population in 2024. The treatment coverage has improved from 53% in 2015 to 92% in 2024. India has contributed to approximately 25% of the total global burden and is ranked 38th globally for incidence rates.

To achieve the Sustainable Development Goals (SDGs) related to TB, the Government has implemented TB Mukht Bharat Abhiyan (National TB Elimination Programme), under the aegis of National Health Mission (NHM) across all the States/UTs in the country. Under TB Mukht Bharat Abhiyan, the key strategies include identification of vulnerable population (includes tribal population) including asymptomatic, screening by Chest X-ray for early detection, upfront Nucleic Acid Amplification Test (NAAT) for all presumptive TB cases, timely treatment initiation & completion, differentiated TB care for managing high-risk TB cases, nutrition support and preventive treatment to eligible vulnerable population.

The details of measures taken under the programme to address TB in the country are as under:

- Targeted interventions in high TB burden areas through State and district specific strategic plans.
- Provision of free drugs and diagnostics to TB patients.
- Active TB case finding campaigns in key vulnerable populations and congregate settings.

- Decentralized TB screening and treatment services to the level of Ayushman Arogya Mandir.
- Private sector engagement with incentives for notification and reporting of treatment outcomes.
- Scale up of molecular diagnostic laboratories to sub-district levels.
- Intensified Information, Education & Communication (IEC) campaigns to reduce stigma, enhance community awareness and improve health seeking behaviour.
- Provision of TB Preventive Treatment to contacts of TB patients and eligible vulnerable population.
- Tracking notified TB cases through Ni-kshay portal.

The Ministry monitors stock positions using DVDMS portal and has conducted regular assessments to monitor stock levels across States/UTs. Release Orders / Transfers Orders are issued routinely from central level to the States/UTs to replenish the stock position of anti TB drugs. Additionally, States and UTs have been provisioned with resources under NHM for local procurement of anti-TB drugs in limited quantities, to address any emergent needs promptly. The State-wise availability of essential MDR-TB drugs and rapid molecular diagnostic kits since 2022, is placed as **Annexure-I** (Annexure 1/A, Annexure 1/B, Annexure 1/C and Annexure 1/D) and **Annexure-II** respectively.
