

**GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**RAJYA SABHA
UNSTARRED QUESTION NO. 2856
TO BE ANSWERED ON 17th MARCH, 2026**

DEMENTIA CARE FACILITIES

2856. SHRI TIRUCHI SIVA:

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) whether any dementia care facilities have been set up by Government, if so, the details thereof, if not, the reasons therefor;
- (b) whether there are certificate courses to train caregivers and healthcare personnel in dementia care, if so, the details thereof;
- (c) whether there are plans to integrate dementia care into the national programme for the Health Care of the elderly; and
- (d) if so, the details thereof?

ANSWER

**THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND
FAMILY WELFARE
(SH. PRATAPRAO JADHAV)**

(a) to (d) The Government has recognized the growing challenges due to the increase in the prevalence of dementia. The issues related to dementia care, prevention and other related public health measures are covered by the existing policies and programs focused on ageing, non-communicable diseases and mental health.

Risk for Dementia can be potentially reduced by better management of Diabetes and Hypertension. Government of India is implementing the National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS) with focus on strengthening infrastructure, human resource development, screening, early detection and management of common Non Communicable Diseases (NCDs) including diabetes and hypertension. Screening for common NCDs is also an integral part of service delivery under Ayushman Bharat – Health and Wellness Centres.

Government is also implementing the National Programme for Health Care of the Elderly (NPHCE). The National Programme for Health Care of the Elderly (NPHCE) already addresses age-related health conditions, including dementia, through its service delivery framework at primary, secondary and tertiary levels of healthcare. The programme supports screening, diagnosis, treatment and rehabilitation services for elderly patients.

Under the programme, geriatric OPD clinics at Primary Health Centres (PHCs), Community Health Centres (CHCs) and District Hospitals (DHs), along with specialized geriatric care at Regional Geriatric Centres (RGCs) and National Centres of Ageing (NCAs), provide comprehensive healthcare services for the elderly, including early identification, management and referral of complicated geriatric cases (including dementia cases). Assessment of elderly patients is undertaken through Comprehensive Geriatric Assessment (CGA) tools to evaluate medical, functional and cognitive status and facilitate appropriate care and referral.

Further, to address the burden of mental disorders, the Government is supporting implementation of the District Mental Health Programme (DMHP) under NMHP in 767 districts of the country for detection, management and treatment of mental disorders/illness. Under the Tertiary care component of National Mental Health Programme, 25 Centres of Excellence and 47 PG Departments have been sanctioned to increase the intake of students in PG departments in mental health specialities as well as to provide tertiary level treatment facilities. The Central and State Mental Health Institutions and the Psychiatric Wings of the Central and State medical colleges also have facilities for early detection and treatment for Alzheimer's Disease, which is the most common cause of Dementia.

As per the information received from Ministry of Social Justice and Empowerment, the Government is implementing the scheme Integrated Programme for Senior Citizens (IPSrC), a component of Atal Vayo Abhyuday Yojana (AVYAY) under which grant in aid is provided to Non Governmental/ Voluntary Organisations for running and maintenance of senior citizen homes (old age homes) wherein facilities like shelter, nutrition, medicare and entertainment are provided free of cost to indigent senior citizens. Under the Scheme grants upto 100% of project cost are given for running and maintenance of Continuous Care Homes and Homes for senior citizens afflicted with Alzheimer's disease/ Dementia for a minimum of 20 Senior Citizens who are seriously ill requiring continuous nursing care and respite or those who are afflicted with Alzheimer's disease/ Dementia.

In addition to the above, the Government is also taking steps to strengthen mental healthcare services at primary healthcare level. The Government has upgraded more than 1.83 lakh Sub Health Centres (SHCs) and Primary Health Centres (PHCs) to Ayushman Arogya Mandirs. Mental health, Neurological and Substance use disorders (including Dementia) services have been added in the package of services under Comprehensive Primary Health Care provided at Ayushman Arogya Mandirs. Operational guidelines on Mental, Neurological, and Substance Use Disorders (MNS) including dementia at Ayushman Arogya Mandirs have been released under the ambit of Ayushman Bharat.

Capacity-building and training programmes for healthcare professionals and caregivers in geriatric mental health and dementia are undertaken through various institutions such as the National Institute of Mental Health and Neurosciences (NIMHANS), Bengaluru and other academic institutions. These include certificate courses and training programmes for caregivers, doctors and healthcare professionals on screening, diagnosis and management of dementia and other cognitive disorders.

Further, Rehabilitation Council of India (RCI) has developed a Certificate Course in Care Giving (C.C.C.G) in which Mental illness, Dementia and other disabling conditions and care giving process are listed.

Beside the above, the Government has launched a “National Tele Mental Health Programme” on 10th October, 2022, to further improve access to quality mental health counselling and care services in the country. As on 03.03.2026, 36 States/ UTs have set up 53 Tele MANAS Cells and have started tele mental health services. More than 34.34 lakh calls have been handled on the helpline number.

The Government has also launched Tele MANAS Mobile Application on the occasion of World Mental Health Day - October 10, 2024. Tele-MANAS Mobile Application is a comprehensive mobile platform that has been developed to provide support for mental health issues ranging from well being to mental disorders. The Government has also launched the video consultation facility under Tele-MANAS, as another upgrade to the already existing audio calling facility.
