

**GOVERNMENT OF INDIA  
MINISTRY OF AYUSH  
RAJYA SABHA  
UNSTARRED QUESTION NO. 3536  
TO BE ANSWERED ON 24<sup>th</sup> MARCH, 2026**

**“AYUSH Digital Health and telemedicine in Chandauli, Uttar Pradesh”**

**3536: Smt. Darshana Singh**

Will the Minister of *Ayush* be pleased to state:

- (a) whether the Ministry has integrated the AYUSH facilities in Uttar Pradesh with the national digital health ecosystem under the Ayushman Bharat Digital Mission, specifically in Chandauli;
- (b) the number of AYUSH doctors registered on digital platforms and the number of those issuing digital health records;
- (c) whether telemedicine services are being conducted in rural and remote areas; and
- (d) whether AI tools are being developed for AYUSH diagnosis, drug standardization and treatment protocols?

**ANSWER**

**THE MINISTER OF STATE (IC) OF THE MINISTRY OF AYUSH  
(SHRI PRATAPRAO JADHAV)**

- (a) Yes, Ministry of Ayush, under the Ayush Grid initiative, has developed Ayush Hospital Management Information System (AHMIS) for adoption across Ayush facilities including Chandauli, Uttar Pradesh. AHMIS is compliant with the national digital health ecosystem under Ayushman Bharat Digital Mission (ABDM) and supports standardized diagnostics, service delivery, and data management for monitoring and community wellness.
- (b) As on date 2350 health professionals working in Ayush health facilities are issuing digital health records. In Chandauli district, 67 Ayush doctors have been registered on Ayushman Bharat Digital Mission.
- (c) Ayush telemedicine services, delivered through eSanjeevani have expanded healthcare access in remote and underserved areas by operationalizing Ayush OPDs and implementing the hub-and-spoke model under eSanjeevani Ayushman Bharat-Ayushman Arogya Mandir (AB-AAM). These initiatives have improved access to consultations without long travel, strengthened last-mile service delivery, and enabled efficient utilisation of Ayush specialists.

(d) The Ayush Grid project serves as the IT backbone of the Ayush sector, driving digital transformation by integrating advanced technologies such as Artificial Intelligence (AI), Machine Learning (ML) across functional areas i.e. Healthcare, Research & Development, Ayush Drugs, Education & Awareness etc. As part of this initiative, several digital platforms have been developed such as My Ayush Integrated Services Portal (MAISP), a master portal of Ministry of Ayush to integrate and streamline various Ayush-related applications and services. Ayush Hospital Management Information System (AHMIS) for diagnostics & service delivery, Ayush Research Portal and National Ayush Morbidity and Standardized Terminologies Electronic (NAMASTE) Portal to support evidence-based research. e-Aushadhi portal has been developed to digitize the process of applying, processing and issuing the license to Ayush drugs manufacturing units and drug testing laboratories.
