

GOVERNMENT OF INDIA  
MINISTRY OF JAL SHAKTI  
DEPARTMENT OF WATER RESOURCES, RIVER DEVELOPMENT & GANGA REJUVENATION  
**RAJYA SABHA**

**UNSTARRED QUESTION NO. 2462**

ANSWERED ON 10.08.2026

**RAINWATER HARVESTING STRUCTURE CREATED UNDER CATCH THE RAIN  
CAMPAIGN AND JJM**

2462            Shri SUJEET KUMAR:

Will the Minister of **Jal Shakti** be pleased to state:

- (a) the number of rainwater harvesting structures created under the Catch the Rain campaign since its inception and during 2025–26, along with the State-wise break-up;
- (b) whether any scientific assessment has been undertaken to evaluate the campaign's impact on groundwater recharge, the districts showing significant improvement in groundwater levels and whether the findings have informed its next phase;
- (c) the proportion of Jal Jeevan Mission (JJM) schemes incorporating rainwater harvesting or groundwater recharge structures for source sustainability; and
- (d) the measures taken to enhance citizen participation in the Catch the Rain campaign?

**ANSWER**

**THE MINISTER OF STATE FOR JAL SHAKTI**

(SHRI RAJ BHUSHAN CHOUDHARY)

**(a) to (d)** ‘Water’ being a State subject, the aspects related to water resources including its conservation are studied, planned, funded and executed by the State Governments themselves as per their own resources and priorities. The Central Government supplements the measures and efforts being taken up by the State Governments.

Jal Sanchay Jan Bhagidari (JSJB) initiative was launched in Surat, Gujarat on 6 September 2024. In June 2025, JSJB 2.0 was launched. The implementation cycle for JSJB 2.0 commenced on 1 June 2025 and concluded on 31 May 2026.

Jal Sanchay Jan Bhagidari: Catch the Rain (JSJB: CTR) – 2026 was launched on 1<sup>st</sup> June 2026 enhancing the scope of the Jal Sanchay Jan Bhagidari (JSJB) initiative and simultaneously integrating it with the Jal Shakti Abhiyan: Catch the Rain (JSA: CTR) campaign. The initiative emphasises Jan Bhagidari by involving local communities in the identification, execution and maintenance of water conservation works. The progress of the campaign is monitored through online portal - JSJB: CTR (<https://jsjb.mowr.gov.in>). The state-wise details of JSJB 1.0, JSJB 2.0 and JSJB: CTR 2026 is attached at **Annexure-I**.

The initiative leverages community funds, individual donations, Corporate Social Responsibility Funds and others for construction of low-cost structures like borewells, recharge shafts, recharge pits, using locally available material, to harvest rainwater, to boost ground water level and provide local tailor-made

solution to water issues. The initiative also emphasizes convergent financing from various schemes of the Central, State and local bodies like Viksit Bharat - Guarantee for Rozgar and Aajeevika Mission (Gramin) (VB-G RAM G), Atal Mission for Rejuvenation and Urban Transformation (AMRUT), Per Drop More Crop, Repair, Renovation and Restoration Components under the Pradhan Mantri Krishi Sinchayee Yojana (PMKSY), Compensatory Afforestation Fund Management and Planning Authority (CAMPA) and Finance Commission grants.

The objective is to ensure that every drop of water is conserved through collective efforts, following a whole-of-society and whole-of-government approach. By fostering community ownership, the initiative seeks to develop cost-effective, local solutions at the micro level for water conservation and ground water recharge. The initiative is guided by the 3Cs principle—Community, CSR and Cost, ensuring effective convergence and maximized outcomes. The Government promotes the initiative in partnership with State Governments and local authorities to ensure its widespread reach and awareness. The initiative aims at forging partnership with stakeholders such as NGOs, Trusts, Civil Societies and educational institutions to engage the broader community effectively.

In 2019, the Ministry of Jal Shakti launched Jal Shakti Abhiyan (JSA) as a time-bound, mission-mode water conservation campaign in 256 water stressed districts of the country. The Hon'ble PM of India launched the campaign in 2021 as Jal Shakti Abhiyan: Catch the Rain (JSA: CTR) with the message, "Catch the Rain: Where It Falls, When It Falls." Since then, JSA: CTR evolved into a national movement, reinforcing India's collective commitment to water security through localised action and institutional convergence. The JSA: CTR campaign was implemented nationwide and each edition had included a targeted focus since 2023 to maximize impact. The JSA: CTR 2023, with the theme "Source Sustainability for Drinking Water," prioritized 150 special focus districts identified by the Jal Jeevan Mission. The JSA: CTR 2024 campaign, themed "Nari Shakti se Jal Shakti," was carried out across the country with a special focus on 151 districts identified by the Central Ground Water Board (CGWB). The JSA: CTR 2025 was launched with the theme "Jal Sanchay Jan Bhagidari: Jan Jagrukta Ki Or" emphasizing deeper grassroots engagement, inter-sectoral convergence and innovative financing mechanisms with special focus on 148 districts identified by CGWB. The state-wise details of JSA: CTR 2021, 2022, 2023, 2024 & 2025 are attached at **Annexure-II**.

To address the challenges faced by States and local bodies in implementing rainwater harvesting systems and to ensure effective implementation of the campaign, the Government of India has adopted a comprehensive, multi-pronged approach. As part of this strategy, State Nodal Officers (SNOs) and District Nodal Officers (DNOs) have been appointed at the State and District levels, respectively, to monitor progress and to provide technical assistance. Besides, meetings are conducted with SNOs, Municipal Commissioners, District Magistrates (DMs)/ Deputy Commissioners (DCs), Partner Central Ministries/Departments, and other stakeholders concerned to provide necessary support and gather feedback.

Village-level feasibility maps have been shared with districts to support technical planning and facilitate the effective implementation of water conservation and groundwater recharge interventions. In

addition, districts across the country have prepared District Water Conservation Plans to ensure sustainable water management in their respective districts.

Jal Shakti Kendras (JSKs) have been established, serving as dedicated resource and knowledge centers to provide technical guidance to locals and support district administration in implementation of rain water harvesting systems.

Panchayati Raj Institutions (PRIs) play a central role in mobilising communities, facilitating local-level planning and ensuring participatory implementation and monitoring of water conservation works. Women Self Help Groups (SHGs), youth, students and local community groups are actively involved in awareness generation, behaviour change communication and social mobilisation, thereby strengthening grassroots participation and ownership. IEC activities, community meetings and field interactions are undertaken to enhance awareness, technical understanding and participatory implementation at the grassroots level.

To further enhance outreach, the National Water Mission (NWM) collaborated with the Department of Youth Affairs, leveraging the network of Nehru Yuva Kendra Sangathan (NYKS) and its youth clubs for mobilizing grassroots participation in water conservation efforts.

A separate outreach initiative, “Dialogue with DMs”, has also been organized since August 2020, where District Magistrates/ Collectors/ Deputy Commissioners share their field-level innovations and experiences in water conservation, fostering cross-learning and inspiring replication of successful practices. Further, several innovative models of groundwater recharge and water conservation are observed across various regions, showcasing the diversity of locally adapted and community-driven solutions. A few of them are given below.

- i. The “Karmbhoomi se Matribhoomi” Model reflects contributions made by individuals working in Gujarat towards recharge projects in their native states, such as Rajasthan, Madhya Pradesh, and Bihar. This voluntary and emotional investment has enabled cross-state support for sustainable groundwater recharge.
- ii. In Maharashtra, the Jal Tara Model involves farmers systematically constructing standardised recharge pits measuring 4 ft × 4 ft × 6 ft across agricultural land. This low-tech but impactful intervention significantly enhances infiltration and supports the recharge of shallow aquifers, thereby benefiting both crop productivity and groundwater sustainability.
- iii. The 5% Model from Korea district in Chhattisgarh illustrates how terraced recharge pits constructed on 5% of cultivable land can significantly improve local aquifer recharge. This model integrates water conservation directly into land-use planning and agricultural practices, resulting in improved soil moisture retention and enhanced groundwater levels. On each farmland, a shallow terraced recharge pit is constructed in a "pit within a pit" design, with farmers voluntarily contributing 5% of their cultivable land.
- iv. In Banaskantha, Gujarat, a large-scale initiative has focused on the construction of low-cost artificial recharge structures in arid regions. This intervention was made possible by leveraging Corporate Social Responsibility (CSR) funding and the active participation of farmer cooperatives.

The model demonstrates how public-private collaboration can effectively address regional water stress, offering a scalable and replicable solution for water-scarce areas.

Under Jal Jeevan Mission (JJM), Government of India assists States by providing financial and technical assistance to provide functional household tap connection to all rural households. Under JJM, the water supply scheme sources *inter alia* include groundwater (open well, borewell, tube well, handpumps, etc.), ancient & traditional surface water (river, reservoir, lake, pond, springs, etc.) and rainwater stored in small tanks used as sources for drinking water supply schemes. Further, conjunctive use of water is promoted for harmonious use of surface water, groundwater and rainwater to ensure availability of water without disruption and also to optimize utilization of sources.

JJM integrates ground water recharge measures—such as dedicated borewell recharge structures, rainwater harvesting, and reuse of greywater— in convergence with other schemes like VB-G RAM G erstwhile MGNREGA, Swachh Bharat Mission, and the JSJB: CTR initiative. Activities like rainwater harvesting and groundwater recharge ensure the long-term availability of water for the tap connections provided under the mission. Further, evidence-based planning for source sustainability is strengthened through a Decision Support System, supported by village and district dashboards, field assessments and institutional monitoring mechanisms.

To enhance citizen participation, JJM has adopted a Jan Bhagidari (people's participation) approach and advised States/ UTs to conduct activities on ground, focused IEC activities, community outreach, social media campaign, youth mobilisation, Peyjal Sanrakshan Pledge drives, Jal Chaupals, source protection activities, Shramdaan, plantation drives, and restoration of traditional water bodies. Through States/UTs, local communities are encouraged to actively participate in water conservation, protection of drinking water sources, and rainwater harvesting activities. The campaign also promotes to engage youths, recognition of local champions, and convergence with ongoing community-based initiatives to transform water conservation into a people's movement.

Central Ground Water Board (CGWB), in coordination with the State/UT Governments, periodically carries out the Dynamic Ground Water Resources Assessment to estimate groundwater recharge, extractable groundwater resources, groundwater extraction and the stage of groundwater extraction, and to assess changes therein over time. As per the assessments, total annual groundwater recharge in the country increased from about 432 BCM in 2017 to 448.52 BCM in 2025. During the same period, the proportion of assessment units categorised as Safe increased from 62.6% to 73.14%, while that of Over-exploited assessment units declined from 17.2% to 10.8%. Recharge attributable to tanks, ponds and other water-conservation structures increased from 13.98 BCM to 26.91 BCM during this period.

The trends indicate an overall improvement in the groundwater scenario and reflects the positive impact of water conservation and groundwater management efforts undertaken by the Government.

\*\*\*

**ANNEXURE REFERRED TO IN REPLY TO PART (a) to (d) OF UNSTARRED QUESTION NO. 2462 TO BE ANSWERED IN RAJYA SABHA ON 10.08.2026 REGARDING “RAINWATER HARVESTING STRUCTURE CREATED UNDER CATCH THE RAIN CAMPAIGN AND JJM”.**
