GOVERNMENT OF INDIA MINISTRY OF SCIENCE AND TECHNOLOGY DEPARTMENT OF SCIENCE AND TECHNOLOGY LOK SABHA STARRED QUESTION NO.143 TO BE ANSWERED ON 26/07/2017

COMMERCIAL LAUNCH OF TECHNOLOGICAL PRODUCTS

†*143. SHRI BHARAT SINGH:

SHRI MANSHANKAR NINAMA:

Will the Minister of SCIENCE AND TECHNOLOGY विज्ञान एवं प्रौद्योगिकी मंत्री pleased to state:

- (a) whether science and technology institutes have commercially launched their technological products in the market during the last three years and if so, the details thereof;
- (b) whether any special steps have been taken by the Government to encourage research projects to provide commercial benefits to the scientists and if so, the details thereof; and
- (c) whether the Government has launched or proposes to launch any product with the collaboration of research institutions of foreign countries and if so, the details thereof?

ANSWER

MINISTER FOR MINISTRY OF SCIENCE AND TECHNOLOGY AND MINISTRY OF EARTH SCIENCES (DR. HARSH VARDHAN)

विज्ञान एवं प्रौद्योगिकी मंत्री और पृथ्वी विज्ञान मंत्री

(डा. हर्ष वर्धन)

(a) to (c): A statement is laid on the Table of the House.

STATEMENT AS REFERRED IN REPLY TO PARTS (a) TO (c) OF LOK SABHA STARRED QUESTION NO.143 FOR 26/07/2017 REGARDING COMMERCIAL LAUNCH OF TECHNOLOGICAL PRODUCTS

(a) Yes, Madam. The science and technology institutes under the Ministry of Science and Technology have commercially launched 129 technological products in the market during the last three years. Of these, some examples are anti-diabetic drug BGR-34, ROTAVAC Vaccine, dengue diagnostic kits, wheat and soybean varieties, nanotechnology-based antimicrobial and self-cleaning textiles, solar power tree and small tractor Krishishakti. The full list is at Appendix-I.

In addition, 32 products have also been commercialized based on indigenous technologies through the financial assistance provided by the Technology Development Board (TDB) and Biotechnology Industry Research Assistance Council (BIRAC) to Indian industry.

- (b) Yes, Madam. The Council of Scientific and Industrial Research (CSIR) and the Department of Biotechnology (DBT) have guidelines in place for incentivizing scientists for undertaking commercially-oriented research. These incentives include sharing of proceeds with scientists from sponsored projects, consultancy projects, technical service projects and premia and royalty received from the industry, allowing the scientists to have an equity stake in scientific enterprises/spin-offs while in professional employment with their parent institutions, mobility of scientists between industry and institutions and other such enabling mechanisms. Some of the autonomous institutions under the Department of Science and Technology (DST) have also evolved similar guidelines.
- (c) Yes, Madam. The Ministry has active Science and Technology Cooperation Programmes with over 40 countries. In recent times, there has been a greater push for technology development with the participation of research institutions and industries from both sides. Some examples of this are Indo-US and, more recently, Indo-German and Indo-Israel programmes. 16 products have so far resulted from the Indo-US programmes. A list of these products is at Appendix-II.
