GOVERNMENT OF INDIA
MINISTRY OF COMMUNICATIONS
DEPARTMENT OF TELECOMMUNICATIONS

LOK SABHA
UNSTARRED QUESTION NO.2805
TO BE ANSWERED ON 2ND AUGUST, 2017

DISRUPTION IN TELECOM SERVICES

2805. SHRI K.R.P. PRABAKARAN:

Will the Minister of COMMUNICATIONS be pleased to state:

(a)   whether the Government has taken note of the instances of frequent disruptions in telecommunication services including internet facility post extreme weather occurrences across the country;

(b)   if so, the details thereof including the number of such instances occurred during each of the last three years and the current year, rural area/urban area-wise and State/UT-wise along with the reasons therefor; and

(c)   the remedial measures taken/being taken by the Government in this regard?

ANSWER

THE MINISTER OF STATE (IC) OF THE MINISTRY OF COMMUNICATIONS &
MINISTER OF STATE IN THE MINISTRY OF RAILWAYS
(SHRI MANOJ SINHA)

(a) & (b)   Instances of disruptions in telecommunication services due to extreme weather occurrences/ natural disaster has been reported from time to time. The details along with reasons thereof are **annexed (Annexure).**

(c)   For mitigating the effects of disaster on telecommunications services, the Department of Telecommunications has been issuing guidelines from time to time to allow intra-circle roaming arrangement between the Telecom Service providers. Periodic monitoring about status of telecom services in the affected areas have been carried out during the disruption of telecommunications services due to natural disaster and all efforts were made to ensure that the services are restored as soon as possible. The respective Telecom Service Providers (TSPs) has also been taking actions for monitoring and early restoration of services in case of any disruption due to extreme weather condition/ natural disaster. Some of the actions taken by the TSPs include:

   (i)   Setting up of special control room (called War Room) for close monitoring of all alarms in the affected areas.
   (ii)   Making available critical spares at Hub / BSC (Base Station Controller)/ RNC (Radio Network Controller) locations to minimize the impact.
   (iii) Making available sufficient diesel stock, whenever there is a forecast about probable cyclone/ floods.
   (iv)   Deployment of additional vehicles/ manpower in the affected areas for quick movement of spares/ technical manpower for early restoration of services.
   (v)   Seeking immediate help from local authorities in obtaining necessary permissions for movement of vehicles, getting diesel on priority etc. for early restoration of services.

In order to standardize the actions to be followed by various stakeholders, a Standing Operating Procedure-2017 has been issued in March 2017 by the Department of Telecommunications for early restoration of Telecommunication network during disasters. Instructions have been issued to TSPs for public alert and mandatory Intra-Circle roaming facility during disaster.

Annexure

SN	Name of License Service Area	Year	Details/ Reasons
1	UP (West)	2016	During first week of July 2016, Chamoli and Pithoragarh districts of Uttarakhand was affected by landslide due to heavy rains and cloudbursts. There was disruption of telecommunication services in these areas.
