#### **ANSWER**

# MINISTER OF STATE FOR DRINKING WATER AND SANITATION (SHRI RAMESH CHANDAPPA JIGAJINAGI)

- (a) Rural Water Supply is a State Subject. However, under the National Rural Drinking Water Programme (NRDWP), Ministry of Drinking Water and Sanitation provides financial and technical assistance to State Governments for rural drinking water supply. States Governments are competent to plan, design, approve and implement rural drinking water supply schemes. This Ministry maintains data for drinking water supply in terms of habitations and not village population wise. Further, as per the Census 2011, 22.1% of the rural households have to fetch drinking water from a distance of more than 500 meters in rural areas.
- (b) The Ministry has prepared a strategic plan to provide safe drinking water to 90% of the rural population of the country through piped water supply schemes by the year 2022 subject to availability of funds. States have been advised to prioritize coverage of all arsenic & fluoride affected rural habitations with surface water based piped water supply schemes as the permanent & sustainable solution. States have also been advised to set up Community Water Purification plants as a short-term measure to provide at least 8-10 litres per capita per day (lpcd) of safe water for drinking & cooking purpose in all remaining arsenic & fluoride affected rural habitations.
- (c) Under NRDWP, State Governments are vested with the power to plan, design, approve and implement rural drinking water supply schemes. This Ministry under NRDWP neither releases funds directly to any Non-Governmental Organization (NGO) nor there is such proposal under consideration of this Ministry.
