(c) : The prices of pulses have fallen primarily on account of bumper domestic production, which increased by 37% from 16.35 million metric tonnes (MT) in 2015-16 to 22.40 million MT in 2016-17. Imports of pulses also rose by 14% during the same period, from 5.79 million MT in 2015-16 to 6.60 million MT in 2016-17.

(d) : To facilitate remunerative prices to farmers and help stabilise their prices, Government has procured pulses under the Price Stabilization Fund (PSF) scheme and the Price Support Scheme (PSS). In addition, Government has also removed stock limits on pulses, has imposed import duty on Tur and has permitted Futures trading of Chana.
