THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND

(a) to (c): The primary cause of diarrhoeal diseases is due to consumption of contaminated water and food. The States/UTs wise cases and deaths as reported by Central Bureau of Health Intelligence (CBHI) due to Acute Diarrhoeal Disease during the current year are placed at Annexure I.

(d): Health is a State subject and the responsibility for providing healthcare facilities to patients primarily lies with the respective State Government. Further, under Integrated Disease Surveillance Programme, States/UTs are provided with additional contractual manpower, training of identified Rapid Response Team (RRT) members for outbreak investigations, strengthening of laboratories for detection of epidemic prone diseases, IT equipment for data entry, analysis and data transfer, and provision of funds for operationalization. Funds are released under IDSP to all the States as grant –in –aid to undertake diseases surveillance and outbreak response activities.
