GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE

LOK SABHA
UNSTARRED QUESTION NO. 537
TO BE ANSWERED ON 20TH JULY, 2018

HEALTH SUB CENTRES

537. SHRIMATI REKHA VERMA:
SHRIMATI BHAVANA PUNDALIKRAO GAWALI PATIL:
SHRI ASHOK MAHADEORAO NETE:

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

(a) whether present Health Centres are sufficient to cater to the public health system in the country;

(b) if so, the details thereof along with the norms fixed and number of sub-centres functioning in the country at presents, State-wise, Union-Territory-wise;

(c) whether there is any job chart for health attendant (woman), ANM and ASHA workers of a sub-centre;

(d) if so, the details thereof;

(e) whether the Government proposes to increase the honorarium of ASHA workers so that they may be financially secured; and

(f) if so, the details thereof?

ANSWER
THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE
(ASHWINI KUMAR CHOUBEY)

(a) & (b): The health care infrastructure in rural areas has been developed as a three tier system and is based on the following population norms :

Centre	Population Norms	
	Plain Area	Hilly/tribal/Difficult
Sub Centre	5000	3000
Primary Health Centre	30000	20000
Community Health Centre	120000	80000

As per Rural Health Statistics 2017, there is shortfalls in availability of different levels of health facilities such as sub centres, primary health centres and community health centres in the country. The States/UT wise details are given at **Annexure-I.**

(c) & (d): Roles and responsibilities/job charts have been prepared for service providers at the sub centre including ANM. The IPHS guidelines for sub centres (Revised 2012) lays down the roles and responsibilities of ANMs, which are available at http://www.nhm.gov.in/nhm/nrhm/guidelines/indian-public-health-standards.html. In addition, prototype job charts and weekly work plans have also been provided in the Ministry of Health and Family Welfare 'Guidebook for enhancing performance of Multi-purpose worker (Female) 2014' which is available at 'http://nhsrcindia.org/category-detail/policy-and-guidelines/ODY=' ASHA is a community level voluntary health worker, who is trained and supported to play a set of healthcare support roles in her community. The roles and responsibilities of ASHA as per the ASHA Guidelines released by the GIO are at **Annexure-II.**

(e) & (f): ASHAs are envisaged as Voluntary Health activists who receive only task/activity based incentives. The incentives to ASHAs finalized at the national level are regularly reviewed by the Government from time to time. In 2013, ASHA incentives were enhanced for many activities and new incentives for routine and recurring activities were introduced to ensure that ASHAs get at least Rs 1000/- per month. Thereafter, the Mission Steering Group of NHM approved incentives for ASHAs at the rate of Rs.100 for notification if the suspect referred is diagnosed to be TB patient by MO/Lab, in 2014. Rs 100/- per round during Indoor Residual Spray i.e. Rs 200 in total for two rounds Indoor Residual Spray, in 2015 and Rs. 150/case for escorting or facilitating beneficiary to the health facility for the Post Abortion IUCD insertion, in 2017. Under the Framework for Implementation of NHM, States have also been given the flexibility to design ASHA incentives.

Notes: The requirement is calculated using the prescribed norms on the basis of rural population from Census, 2011. All India shortfall is derived by adding state-wise figures of shortfall ignoring the existing surplus in some of the states.

*R: Required; P: In Position; S: Shortfall; *: Surplus*

Annexure -II

Roles and Responsibilities of an ASHA

The roles and responsibilities of an ASHA include the functions of a healthcare facilitator, a service provider and a health activist. Broadly her functions involve providing preventive, promotive and basic curative care in a role complementary to other health functionaries; educating and mobilizing communities particularly those belonging to marginalized communities, for adopting behaviours related to better health and create awareness on social determinants, enhancing better utilization of health services; participation in health campaigns and enabling people to claim health entitlements.

Her roles and responsibilities would be as follows:

- ASHA will take steps to create awareness and provide information to the community on determinants of health such as nutrition, basic sanitation and hygienic practices, healthy living and working conditions, information on existing health services and the need for timely use of health services.
- She will counsel women and families on birth preparedness, importance of safe delivery, breastfeeding and complementary feeding, immunization, contraception and prevention of common infections including Reproductive Tract Infection/Sexually Transmitted Infection (RTIs/STIs) and care of the young child.
- ASHA will mobilize the community and facilitate people's access to health and health related services available at the village/sub-centre/primary health centres, such as Immunization, Ante Natal Check-up (ANC), Post Natal Check-up (PNC), ICDS, sanitation and other services being provided by the government.
- She will work with the Village Health, Sanitation and Nutrition Committee to develop a comprehensive village health plan, and promote convergent action by the committee on social determinants of health. In support with VHSNC, ASHAs will assist and mobilize the community for action against gender based violence.
- She will arrange escort/accompany pregnant women & children requiring treatment/ admission to the nearest pre- identified health facility i.e. Primary Health Centre/Community Health Centre/First Referral Unit (PHC/CHC/FRU).
- ASHA will provide community level curative care for minor ailments such as diarrhoea, fevers, care for the normal and sick newborn, childhood illnesses and first aid. She will be a provider of Directly Observed Treatment Short-course (DOTS) under Revised National Tuberculosis Control Programme. She will also act as a depot holder for essential health products appropriate to local community needs. A Drug Kit will be provided to each ASHA. Contents of the kit will be based on the recommendations of the expert/technical advisory group set up by the Government of India. These will be updated from time to time, States can add to the list as appropriate.
- The ASHA's role as a care provider can be enhanced based on state needs. States can explore the possibility of graded training to the ASHA to provide palliative care,

screening for non- communicable diseases, childhood disability, mental health, geriatric care and others.

- The ASHA will provide information on about the births and deaths in her village and any unusual health problems/disease outbreaks in the community to the Sub-Centres/Primary Health Centre. She will promote construction of household toilets under Total Sanitation Campaign.

The ASHA will fulfill her role through five activities:

1. Home Visits: For up to two hours every day, for at least four or five days a week, the ASHA should visit the families living in her allotted area, with first priority being accorded to marginalized families. Home visits are intended for health promotion and preventive care. They are important not only for the services that ASHA provides for reproductive, maternal, newborn and child health interventions, but also for non-communicable diseases, disability, and mental health. The ASHA should prioritize homes where there is a pregnant woman, newborn, child below two years of age, or a malnourished child. Home visits to these households should take place at least once in a month. Where there is a new born in the house, a series of six visits or more becomes essential.
2. Attending the Village Health and Nutrition Day (VHND): The ASHA should promote attendance at the monthly Village Health and Nutrition Day by those who need Aganwadi or Auxiliary Nurse Midwife (ANM) services and help with counselling, health education and access to services.
3. Visits to the health facility: This usually involves accompanying a pregnant woman, sick child, or some member of the community needing facility based care. The ASHA is expected to attend the monthly review meeting held at the PHC.
4. Holding village level meeting: As a member or member secretary of the Village Health, Sanitation and Nutrition Committee (VHSNC), the ASHA is expected to help convene the monthly meeting of the VHSNC and provide leadership and guidance to its functioning. These meetings are supplemented with additional habitation level meetings if necessary, for providing health education to the community.
5. Maintain records: Maintaining records which help her in organizing her work and help her to plan better for the health of the people.
