

**GOVERNMENT OF INDIA  
MINISTRY OF HEALTH AND FAMILY WELFARE  
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**LOK SABHA  
STARRED QUESTION NO. 122  
TO BE ANSWERED ON THE 10<sup>TH</sup> FEBRUARY, 2023**

**ANAEMIA MukT BHARAT ABHIYAN**

**\*122. SHRI KESINENI SRINIVAS:  
SHRI KAUSHALENDRA KUMAR:**

Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) the main features of the Anaemia MukT Bharat Abhiyan and progress made under this campaign since its inception, State-wise;

(b) the fund allocated and utilised under Anaemia MukT Bharat Abhiyan and Poshan Abhiyan since 2019, State-wise and also district-wise;

(c) the details of cases of stunting among children, State-wise and district-wise;

(d) the steps taken/being taken by the Government to address the cases of child wasting and stunting;

(e) whether it is a fact that 67 per cent boys and 59 per cent girls upto the age of five years are suffering from anaemia and if so, the steps taken/ being taken by the Government to control this disease; and

(f) whether the Government is aware of the increasing number of anaemia cases among women and children in Barpeta district of Assam from 2016 to 2021 and if so, the details of initiatives taken/being taken to improve the situation?

**ANSWER  
THE MINISTER OF HEALTH AND FAMILY WELFARE  
(DR MANSUKH MANDAVIYA)**

(a) to (f) A Statement is laid on the Table of the House.

**STATEMENT REFERRED TO IN REPLY TO LOK SABHA  
STARRED QUESTION NO. 122 FOR 10<sup>TH</sup> FEBRUARY, 2023**

(a) In 2018, the Government of India launched the Anaemia Mukht Bharat (AMB) strategy to comply with the targets of POSHAN Abhiyan and National Nutrition Strategy set by NITI Aayog. The AMB strategy is designed to reduce prevalence of anaemia in women, children and adolescents through life cycle approach.

The 6X6X6 strategy aims to reduce anaemia among six beneficiaries age group through implementation of six interventions and six institutional mechanisms.

**The six beneficiaries age groups** are Children 6-59 months; Children 5-9 years, Adolescents 10-19 years, Women of Reproductive Age (15-49 years), Pregnant Women and Lactating women.

**The six interventions are** Prophylactic Iron and Folic Acid Supplementation in all six target age groups; Deworming among children 1-19 years; Intensified year-round Behaviour Change Communication (BCC) Campaign; Testing and treatment of anaemia, using Digital Invasive Haemoglobinometer; Provision of IFA fortified food in government funded public health programmes; and Addressing non-nutritional causes of anaemia in endemic pockets with special focus on malaria, haemoglobinopathies and fluorosis

**The six institutional mechanisms** include Intra-ministerial coordination; Anaemia Mukht Bharat Programme Management Unit; National Centre of Excellence and Advanced Research on Anaemia Control, AIIMS, New Delhi; Convergence with other Ministries; Strengthening Supply Chain and logistics; and Anaemia Mukht Bharat dashboard- one stop portal for AMB.

The State-wise progress under AMB since 2018 is provided at **Annexure I**.

(b) Under National Health Mission (NHM), funds are released to the States/UTs in flexible pools, to conduct the approved programme activities. Data on releases and utilization are maintained State/UT-wise at national level.

The details of State-wise funds allocated and utilized under Anaemia Mukta Bharat Abhiyan from FY 2019-20 to FY 2022-23 (as on 30.09.2022) is provided at **Annexure II**

The details of State-wise funds allocated and utilized under POSHAN Abhiyan from FY 2019-20 to FY 2021-22 (as on 31.03.2022) are provided at **Annexure III**.

(c) The details of State-wise and district-wise cases of stunting among children under 5 years of age as per National Family Health Survey-5 (NFHS-5, 2019-21) are available at [http://rchiips.org/nfhs/districtfactsheet\\_NFHS-5.shtml](http://rchiips.org/nfhs/districtfactsheet_NFHS-5.shtml)

(d) The Ministry of Women and Child Development is implementing several schemes like POSHAN Abhiyan, Anganwadi Services, Scheme for Adolescent Girls and Pradhan Mantri Matru Vandana Yojana (PMMVY) as direct targeted interventions to address the problem of malnutrition in the country.

Under National Health Mission (NHM), several programmes are implemented under Reproductive, Maternal, Newborn, Child, Adolescent Health and Nutrition (RMNCAH+N) strategy as a life cycle approach which have the potential to contribute in prevention of childhood stunting and wasting, which include Community Based care of New-born and Young Children, Mothers' Absolute Affection (MAA), Nutrition Rehabilitation Centres (NRCs), Rashtriya Bal Swasthya Karyakaram (RBSK), Janani Shishu Suraksha Karyakram (JSSK) and the intervention of Village Health, Sanitation and Nutrition Day (VHSND).

Universal Immunization Program, Social Awareness and Actions to Neutralize Pneumonia Successfully (SAANS); Intensified Diarrhoea Control Fortnight initiative are also contributing in reduction of under-nutrition burden by prevention of infection in under-5 children.

(e) The prevalence of anaemia is 67.2 percent among male children aged 6-59 months and 67.0 percent among female children aged 6-59 months as per National Family Health Survey-5 (NFHS-5, 2019-21). The steps taken by the Ministry of Health and Family Welfare to address the problem of anaemia are:

- i. Prophylactic Iron Folic Acid Supplementation to all six beneficiaries age group
- ii. Periodic deworming in children and adolescents in age group 1-19 years
- iii. Intensified year-round Behaviour Change Communication (BCC) Campaign
- iv. Testing and treatment of anaemia, using digital methods and point of care treatment, with special focus on pregnant women and school-going adolescents
- v. Provision of IFA fortified food in government funded public health programmes
- vi. Addressing non-nutritional causes of anaemia in endemic pockets with special focus on malaria, hemoglobinopathies and fluorosis
- vii. Providing incentives to the ANM for identification and follow-up of pregnant women with severe anaemia in high priority districts (HPDs)
- viii. Management of severe anaemia in pregnant women by administration of IV Iron Sucrose/ Blood transfusion
- ix. Strengthening supply chain management of Iron and Folic Acid supplements
- x. Convergence and coordination with other line departments and ministries for strengthening implementation
- xi. National Centre of Excellence and Advanced Research on Anaemia Control (NCEAR-A) at AIIMS, Delhi engaged in capacity building of health care providers
- xii. Development of AMB Training Toolkit and AMB e-Training Modules to facilitate training of the health care providers in anaemia management

(f) In Barpeta district of State of Assam, the prevalence of anaemia among children age 6-59 months is 63.5 percent as per the National Family Health Survey-5 (NFHS-5, 2019-21) compared to 30.2 percent as per NFHS-4 (2015-16) and the prevalence of anaemia among women age 15-49 years is 64.8 percent as per NFHS-5 (2019-21) compared to 35.5 percent as per NFHS-4 (2015-16).

The initiatives taken by Government of Assam are:-

- i. Strengthening of the IFA Supply and distribution chain upto the level of ASHAs
- ii. Every ASHA is being provided with red colour wrist bands inscribed with “*Anaemia Mukh Asom*” to wear during the VHSNDs, to remind the ASHA to counsel the beneficiaries on consumption of IFA tablets
- iii. Convergence with line departments across all the districts including Barpeta to improve and eliminate anemia in children and women.

**State/UT-wise Progress on coverage of Iron and Folic Acid (IFA) among beneficiary groups from FY 2018-19 to FY 2021-22 (Source: HMIS)**
