SHRI ARUN SAO:
SHRI VIJAY BAGHEL:
SHRI SHIVAKUMAR C. UDASI:
SHRI MOHAN MANDAVI:**

Will the Minister of **COMMERCE AND INDUSTRY** be pleased to state:

वाणिज्य एवं उद्योग मंत्री

- (a) whether the Government has formulated any plan to reduce logistics cost from 13% to single digit;
- (b) if so, the details thereof; and
- (c) the steps taken by the Government to reduce the cost of logistics in India to be comparable to global benchmark by 2030 and also to create data driven decision support mechanism for an efficient logistics ecosystem?

ANSWER

**वाणिज्य एवं उद्योग मंत्रालय में राज्य मंत्री (श्री सोम प्रकाश)
THE MINISTER OF STATE IN THE MINISTRY OF COMMERCE & INDUSTRY
(SHRI SOM PARKASH)**

- (a) & (b):** Yes, to reduce logistics cost, Government has launched the PM GatiShakti National Master Plan initiative on 13 October 2021 and to complement it, National Logistics Policy was notified in September, 2022. PM GatiShakti National Master Plan is a transformative approach for improving logistics efficiency and reducing logistics cost, with focus on integration of existing and proposed infrastructure development initiatives of different agencies, to ensure first and last mile connectivity, for seamless movement of people and goods. While development of integrated infrastructure and network planning is addressed through the PM Gati Shakti National Master Plan, for efficiency in services (like processes, digital systems, regulatory framework) and human resource, the National Logistics Policy, through its Comprehensive Logistics Action Plan (CLAP), provides a framework for creating data-driven decision support mechanism aimed at reducing logistics cost and enhancing logistics efficiency in the country.
- (c):** As part of the Comprehensive Logistics Action Plan (CLAP) under the National Logistics Policy 2022, the Government is focusing on development of integrated digital logistics systems and IT solutions through Unified Logistics Interface Platform (ULIP). Currently, 33 digital systems across 7 line Ministries/Departments have been integrated on to ULIP. Such integrated digital systems intend to help achieve greater information symmetry across supply chains and enable more informed decision-making for both, domestic and international trade.
