Discrepancy highlighted by CAG in Audit report no 20 of 2016 and action taken note

S.No.	Issues mainly related to bidding process raised in Audit Report No. 20 of 2016	Final Action taken notes on the Audit Report No. 20 of 2016
1.	Potential level of competition was not achieved during coal mines auctioned in the first two tranches due to the provision of allowing the same company / parent-subsidiary company coalition / JV coalition to independently participate in e-auction of a particular coal mine	Considering no deviation from provisions of Tender document and participation of minimum 3 or more independent companies were there in all coal mines, it was requested to drop the para.
2.	Disqualification of WBPDCCL from participating in the auction of Sarisatolli and Trans- Damodar coal mines, on the basis of it being a prior allottee and not depositing the additional levy within the prescribed time is not as per the existing provisions.	<p>Bid of WBPDCCL was rejected for not paying additional levy. Later on, when it was clarified that mining lease was executed in favour of Bengal EMTA Coal Mines Ltd., liability to pay additional levy did not lie with WBPDCCL. WBPDCCL was technically qualified for allotment process.</p> <p>Since, there was 7 technically qualified bidders for trans damodar coal mine and 5 for Sarisatoli Coal mine, there was enough competition despite rejection of WBPDCCL. Considering this Ministry requested for dropping of audit comments</p>

3.	Complete audit trail was not captured by the e-auction platform provided by MSTC. The system as developed by the company did not capture the logout details of the bidders from the system during e-auction. As such, the audit trail of the complete activities of the bidders could not be traced.	MSTC would be advised for system improvement
4.	The registration process and the registration number issued were not linked with the SEUP, even though the bidding was to be made for SEUP/s and only one bid could be submitted for one SEUP for one coal mine.	Multiple registrations were permitted. There was no bar on a company to make more than one ID for bidding. Tender document provide a unique End Use Plant (EUP) for bidding. There was no case of multiple bid from a single EUP. There was no Act & rule violated nor any financial loss observed. However, as suggested by audit to link SEUP with registration ID at registration stage itself, MSTC would be advised for system improvement
