

GOVERNMENT OF INDIA  
MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

**LOK SABHA**  
**UNSTARRED QUESTION NO. 2874**  
TO BE ANSWERED ON 07.08.2023

**Waste Disposal System**

2874. SHRI GYANESHWAR PATIL:  
SHRI NAYAB SINGH:

Will the Minister of ENVIRONMENT, FOREST AND CLIMATE CHANGE be pleased to state:

- (a) the plan and policies of the Government to manage waste disposal system in each district of the country to reduce carbon emissions in small cities;
- (b) whether the Government has conducted any research and development in the field of sustainable waste disposal system near waste landfill areas to improve cleanliness and reduce toxic gases in the area;
- (c) if so, the details thereof; and
- (d) if not, the steps taken by the Government and the policy formulated for revival of landfill in each city in this regard?

**ANSWER**

MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE  
(SHRI ASHWINI KUMAR CHOUBEY)

(a) to (d): The Solid Waste Management Rules, 2016, provide the statutory framework for management of solid waste in the country. As per the Rules, the local authorities and village panchayats are responsible for solid waste management. The Central Government has launched Swachh Bharat Mission Urban 2.0 (SBM-U 2.0) in October 2021 with overall vision of creating "Garbage Free Cities", to be executed over five years, which would involve achieving the target that all Urban Local Bodies will become at least 3-star certified (as per Star Rating Protocol for Garbage Free Cities), with at least 80% wards covered with door to door collection, 60% source segregation practised in each ward, and at least 80% of municipal solid waste being scientifically processed. Under Swachh Bharat Mission – Grameen Phase II, Department of Drinking Water and Sanitation has issued operational guidelines to the States and Union Territories which include solid waste management activities at the village level.

The Schedule I of the Solid Waste Management Rules, 2016, provides specification for sanitary landfills, which includes criteria for (i) site selection, (ii) development of facilities at the sanitary landfill, (iii) criteria for pollution prevention including leachate management, (iv) air and water quality monitoring including landfill gas control system to minimize odour and prevent off-site migration of gases, and (v) operation of landfill and closure on completion of landfilling. The Criteria for closure of and rehabilitation of old waste dumps have also been

prescribed under the Rules. Central Pollution Control Board has also issued guidelines for Disposal of Legacy Waste (Old Municipal Solid Waste). Directions under Section 5 of Environment (Protection) Act, 1986, have been issued to all State Pollution Control Boards / Pollution Control Committees for enforcement of provisions of Solid Waste Management Rules, 2016, regarding biomining of legacy waste.
