GOVERNMENT OF INDIA MINISTRY OF POWER LOK SABHA UNSTARRED QUESTION NO.847 ANSWERED ON 07.12.2023

SCHEME FOR BESS

847. SHRI A. GANESHAMURTHI:

Will the Minister of POWER be pleased to state:

- (a) whether the Government has recently approved Viability Gap Funding scheme for developing Battery Energy Storage System (BESS);
- (b) if so, the details thereof;
- (c) whether it would reduce carbon emissions and dependence on fossil fuel and if so, the details thereof; and
- (d) the details of the quantity of surplus energy from BESS expected to be given to DISCOMS during peak hour demand during the next five years, Statewise?

ANSWER

THE MINISTER OF POWER AND NEW & RENEWABLE ENERGY

(SHRI R.K. SINGH)

(a) & (b): Yes, Sir. Cabinet in its meeting held on 06.09.2023 approved the scheme for Viability Gap Funding (VGF) for development of Battery Energy Storage Systems (BESS) with capacity of 4,000 MWh. Under the scheme, projects will be approved during a period of 3 years (2023-24 to 2025-26). The disbursement of funds will extend upto 2030-31 in 5 tranches. The cost of BESS system is anticipated to be in the range of $\{2.40 \text{ to } \{2.20 \text{ Crore/MWh} \text{ during the period } 2023-26 \text{ for development of BESS capacity of } 4,000 \text{ MWh, which translates into Capital Cost of } \{9,400 \text{ Crores with a Budget support of } \{3,760 \text{ Crores.} \}$

VGF to the extent of upto 40% of capital cost for BESS shall be provided by the Central Government. Public and private sector entities shall be selected for development of BESS through the bidding process to be conducted by the Implementing Agency(ies) as per the provisions of the Scheme and Bidding Guidelines.

(c) & (d): The implementation of a 4,000 MWh is expected to result in an annual reduction of approximately 1.3 million metric tons (MMT) of carbon emissions (CO2) considering charging of BESS with Renewable Energy (RE). This will make up to 4,000 MWh of energy available during peak hours for Discoms and other beneficiaries to utilize, depending on their specific usage patterns.
