**A market study on e-commerce in India was commissioned by the CCI with a view to better understand the functioning of e-commerce in India and its implications for markets and competition. The objective was also to identify impediments to competition, if any, emerging from e-commerce and to ascertain the Commission's enforcement and advocacy priorities in light of the same. The report enumerated certain areas for self-regulation by the e-commerce marketplace platforms. The Commission under its advocacy mandate urged the e-commerce platforms to put in place transparency measures such as search**
