A large majority of total cases (96.91%) have recovered. India's case fatality rate of 1.41% is also lowest among similarly affected countries. As of now, five States (Maharashtra, Kerala, Punjab, Karnataka, and Tamil Nadu) are contributing to 83.98% of all active cases in the country, of these only 2 States (Kerala and Maharashtra) are contributing to almost 74.37% of all active cases in the country. - (c) Government is increasing the speed of the vaccination drive by increasing the number of COVID-19 Vaccination Centres (CVCs) in Government as well as Private Health Facilities.
- (d) Since 'Health' is a State responsibility, no centralized data on number of healthcare workers/frontline workers providing treatment to COVID-19 patients in each State/UT is being maintained by Ministry of Health & Family Welfare but such database is available with States/UTs.
