SHRI MANOJ KOTAK:**

Will the Minister of **COMMERCE AND INDUSTRY** be pleased to state:

वाणिज्य एवं उद्योग मंत्री

- (a) the features of the Make in India Scheme;
- (b) whether the Government is aware that 'Make in India' aimed to increase the contribution of manufacturing in GDP to 25 per cent;
- (c) if so, the details of its present status;
- (d) whether any positive impact of 'Make in India' initiative has been noted in the country in respect of manufacturing infrastructure and generation of employment in comparison with earlier situation;
- (e) if so, the details thereof; and
- (f) if not, the reasons therefor?

ANSWER

वाणिज्य एवं उद्योग मंत्रालय में राज्य मंत्री (श्री सोम प्रकाश)

**THE MINISTER OF STATE IN THE MINISTRY OF COMMERCE & INDUSTRY
(SHRI SOM PARKASH)**

- (a) to (f):** 'Make in India' is an initiative which was launched on 25th September, 2014 to facilitate investment, foster innovation, build best in class infrastructure, and make India a hub for manufacturing, design, and innovation. It is one of the unique 'Vocal for Local' initiatives that promoted India's manufacturing domain to the world.

'Make in India' initiative has significant achievements and presently focuses on 27 sectors under Make in India 2.0. Department for Promotion of Industry and Internal Trade (DPIIT) coordinates action plans for 15 manufacturing sectors, while Department of Commerce coordinates 12 service sector plans. Investment outreach activities are done through Ministries, State Governments and Indian Missions abroad for enhancing International co-operation and promoting both domestic and foreign investment in the country.

In addition to ongoing schemes of various Departments and Ministries, Government has taken various steps to boost domestic and foreign

investments in India. These include the introduction of Goods and Services Tax, reduction in Corporate taxes, enactment of four labour codes, improving ease of doing business, FDI policy reforms, reduction in compliance burden, policy measures to boost domestic manufacturing through public procurement orders, Phased Manufacturing Programme (PMP), to name a few.

The series of measures taken by the Government to improve the economic situation and convert the disruption caused by COVID 19 into an opportunity for growth includes Atmanirbhar packages, introduction of Production Linked Incentive (PLI) Scheme in various Ministries, investment opportunities under National Infrastructure Pipeline (NIP) and National Monetisation Pipeline (NMP), India Industrial Land Bank (IILB), Industrial Park Rating System (IPRS), soft launch of the National Single Window System (NSWS), etc.

Further, with a view to support, facilitate and provide investor friendly ecosystem to investors investing in India, the Union Cabinet on 03rd June, 2020 has approved constitution of an Empowered Group of Secretaries (EGoS), and also Project Development Cells (PDCs) in all concerned Ministries/ Departments to fast-track investments in coordination between the Central Government and State Governments, and thereby grow the pipeline of investible projects in India to increase domestic investments and FDI inflow.

Keeping in view India's vision of becoming 'Atmanirbhar' and to enhance India's Manufacturing capabilities and Exports, an outlay of INR 1.97 lakh crore (over US\$ 26 billion) has been announced in Union Budget 2021-22 for PLI schemes for 14 key sectors of manufacturing, starting from fiscal year (FY) 2021-22. With the announcement of PLI Schemes, significant creation of production, skills, employment, economic growth and exports is expected over the next five years and more.

The reforms taken by Government have resulted in increased Foreign Direct Investment (FDI) inflows in the country. FDI inflows in India stood at US \$ 45.15 billion in 2014-2015 and have continuously increased since then, and India registered its highest ever annual FDI inflow of US\$ 83.57 billion (provisional figures) in the financial year 2021-22.

As per Economic Survey 2021-22, inspite of Covid related disruptions there is trend of positive overall growth of Gross Value Addition (GVA) in manufacturing sector. The total employment in this sector has increased from 57 million in the year 2017-18 to 62.4 million in the year 2019-20.

The activities under the Make in India initiative are also being undertaken by several Central Government Ministries/ Departments and various State Governments. Ministries formulate action plans, programmes, schemes and policies for the sectors being dealt by them, while States also have their own Schemes for attracting investments.
