(a) The details of the total number of medical colleges across the country, State/UT-wise is at Annexure.

(b) to (f) Fee structures differ from State to State vis-a-vis Government / Private Medical Colleges as per the guidelines issued by concerned State Fee Regulatory Authorities. Government continuously endeavours to make education more affordable and prevent commercialization of it. In order to make medical education affordable and accessible in the country, the fee structure of Government medical colleges is subsidized.

Furthermore, Clause (i) of Sub-section (1) of Section 10 of the National Medical Commission Act (NMC), 2019 provides for framing of guidelines for determination of fees and all other charges in respect of fifty percent (50%) of seats in private medical institutions and deemed to be universities which are governed under the provisions of the Act. Accordingly, NMC has framed the guidelines and the same was issued on 03.02.2022.

The benefit of the prescribed fee structure shall benefit 50% of the medical students admitted in MBBS/PG courses in private medical colleges and deemed to be universities.
