TO BE ANSWERED ON 23.07.2025**

Systemic Failures in Research and Development

595. Smt. Jyotsna Charandas Mahant:

Will the Minister of Science & Technology be pleased to state:

- (a) the details of number of patents filed by publicly funded research institutions in India during the last five years, institution-wise;**
- (b) the details of number of patents granted in India during the last five years, institution-wise;**
- (c) the details of number of patent examiners and other administrative officers in patent offices across the country during the last ten years, and the number currently required, year-wise; and**
- (d) the manner by which the Government will undertake institutional reforms to address the systemic failures in research and development in the country**

ANSWER

**MINISTER OF STATE (INDEPENDENT CHARGE) FOR THE
MINISTRY OF SCIENCE AND TECHNOLOGY AND EARTH SCIENCES
(DR. JITENDRA SINGH)**

(a) The Council of Scientific and Industrial Research (CSIR), an autonomous organization with Department of Scientific and Industrial Research has filed 1234 patents in India in the past five years (2020-21 to 2024-25). The Department of Biotechnology (DBT), Ministry of Science & Technology supports a network of autonomous research institutions across the country. The number of Indian patents filed by these DBT supported research institutions during the last five years is 262. The Department for Promotion of Industry and Internal Trade (DPIIT), Ministry of Commerce & Industry, maintains a list of Patents filed by Publicly funded research institutions in India and the details for the number of Patents filed In India, Institution wise, in the last five years is given in Annexure I.

- (b) 1283 Indian patents have been granted to CSIR in the past five years (2020-21 to 2024-25). 119 Patents have been granted to DBT supported autonomous research institutions. The details of the number of Patents filed and granted to DBT supported autonomous research institutions across the country, Institution wise, in the last five years is given at Annexure II. The list of patents granted Institution-wise, as per the data maintained by Department for Promotion of Industry and Internal Trade (DPIIT), Ministry of Commerce & Industry is given in Annexure-III.**
- (c) The details for the number of patent examiners and other administrative officers in Patent offices across India in the last ten years, and the number currently required, year-wise is given in Annexure IV.**
- (d) Department of Scientific and Industrial Research, Ministry of Science & Technology has been providing registration to Public funded research institutions in India to enable them avail custom duty exemptions on purchase of Scientific equipment, goods & consumables used for scientific research. The programme aims to support research, innovation, creation of infrastructure and technological prowess in such publicly funded research institutions. The list of PFRIs registered with DSIR can be accessed from DSIR website, dsir.gov.in. The performance of the schemes/ programmes in DSIR/CSIR to support S&T and innovation in the country is being monitored regularly (monthly). To meet national S&T aspirations, CSIR has taken a judicious approach to strengthen existing provisions to facilitate better performance of the Council and its constituents. Towards this, the merger of laboratories, namely CSIR-National Institute of Science Communication and Information Resources (CSIR-NISCAIR) and National Institute of Science, Technology and Development Studies (CSIR-NISTADS) into one entity named CSIR-National Institute of Science Communication and Policy Research (CSIR-NIScPR) was effected in 2021. CSIR has also upgraded one of its Unit, namely CSIR-Fourth Paradigm Institute (CSIR-4PI) to a national laboratory status in 2024, in due consideration of the emerging importance of advanced digital technologies such as data science, machine learning and artificial intelligence to address national needs of societal and strategic importance. The Council also undertakes regular review of the performance of it's constituent laboratories. DBT is addressing systemic challenges in research and development by nurturing a**

stronger and more responsive R&D ecosystem. This is being achieved through increased focus on both basic and translational research across key areas such as healthcare & medical biotechnology, agricultural biotechnology & allied sectors, bioenergy, bioresources & environmental biotechnology etc. DBT has recently launched a flagship Biomanufacturing Programme to build and scale indigenous biomanufacturing capabilities. The Department also promotes public-private partnerships through BIRAC, enabling industry participation in innovation and product development. To support technology transfer and commercialization, DBT through BIRAC is strengthening intellectual property (IP) management by establishing regional Technology Transfer Offices (TTOs). Additionally, sustained investments in human resource development are being made through DBT supported fellowships, as well as doctoral and post-doctoral programmes. These measures are aimed at improving research quality, enhancing innovation outputs and facilitating effective technology translation to ensure that publicly funded research delivers good scientific and technological outcomes.
