GOVERNMENT OF INDIA MINISTRY OF JAL SHAKTI DEPARTMENT OF DRINKING WATER & SANITATION

LOK SABHA UNSTARRED QUESTION NO. 912

ANSWERED ON 04.12.2025

TARGETS UNDER 'HAR GHAR NAL SE JAL' YOJANA UNDER JJM

†912. SMT. GENIBEN NAGAJI THAKOR:

Will the Minister of JAL SHAKTI be pleased to state:

- (a) whether the 'Har Ghar Nal Se Jal' yojana under the Jal Jeevan Mission (JJM) has failed to achieve its intended targets in several States across the country;
- (b) if so, the details thereof along with the reasons therefor including incomplete projects, poor quality of pipelines, lack of adequate water sources and corruption-related complaints;
- (c) the number of rural households across the country which are still not receiving safe drinking water through tap connections, State-wise;
- (d) the current status of the said mission in Gujarat and the percentage of rural households actually provided with functional tap connections so far;
- (e) whether the Government has conducted any independent review/audit to assess the progress and quality of implementation under the said mission and if so, the key findings thereof; and
- (f) the steps being taken by the Government for effective implementation of the said mission and to rectify failed or poorly implemented projects?

ANSWER

THE MINISTER OF STATE FOR JAL SHAKTI

(SHRI V. SOMANNA)

(a) to (d) Since August 2019, Government of India in partnership with States, is implementing centrally sponsored scheme Jal Jeevan Mission (JJM) – Har Ghar Jal to make provision of tap water supply to every rural household in all villages across the country.

At the time of announcement of Jal Jeevan Mission, 3.23 Crore (17%) rural households were reported to have tap water connections. So far, as reported by States/ UTs as on 01.12.2025, around 12.52 Crore additional rural households have been provided with tap water connections. Thus, as on 01.12.2025, out of 19.36 Crore rural households, more than 15.75 Crore (81.36%) households, are reported to have tap water supply in their homes and works for the remaining 3.69 Crore households are at various stages of completion as per saturation plan of the respective State/ UT.

Further, the State of Gujarat has been reported as 'Har Ghar Jal' i.e. 100% rural households having tap water connection. State/ UT-wise details of progress under the Mission, including that of Gujarat, are **annexed**.

- (e) & (f) Under JJM, the Department undertakes assessment of the functionality of household tap water connections provided under the Mission, through an independent third-party agency, selected based on standard statistical sampling. Functionality Assessment survey, 2024 was conducted in Har Ghar Jal Villages and the key findings of the report are as under:
 - Tap Connection Availability: 98.1% of households in surveyed villages had tap connections.
 - Functionality of Tap connections :
 - 87% of households with tap connections reported receiving water in the past week, indicating overall progress.
 - Regularity: 84% households receive water as per schedule, showing a minor decline from previous assessments.
 - Quantity: 80% households found receiving the minimum 55 LPCD water.
 - Quality: 76% households found free from bacteriological contamination and 81% households of the supply source found free from chemical contamination;
- Overall functionality: Considering the parameters of quantity, quality and regularity, 76% of household tap connections were assessed as functional.

To ensure universal coverage through tap water connection, the Department has evolved a comprehensive multi-level and multi-format system of monitoring and evaluation of the implementation of programme, linking AADHAR of the head of household for targeted delivery and monitoring of specific outcomes, subject to statutory provisions, including geo-tagging of assets created, third-party inspections before making payments, measurement and monitoring of water supply in villages through sensor-based IoT solution on pilot basis, etc. Further, to expedite the implementation and strengthening the existing monitoring mechanisms under Jal Jeevan Mission aiming at improving efficiency and effectiveness, steps like Village/ District Dashboards and linking Village Level Dashboards to eGramswaraj portal, District Collectors' Peyjal Samvad, Institutionalization of Role of National WASH Experts (NWEs) through IMIS module, Role of TPIAs, strengthened collaboration with line Ministries, Decision Support System for strengthening Source Sustainability, Handbook on Community Managed Piped Water Systems, Unique ID for integrated Piped Water System, etc. have recently been taken up under JJM.
