

**GOVERNMENT OF INDIA
MINISTRY OF AYUSH
LOK SABHA
STARRED QUESTION NO.*118
TO BE ANSWERED ON 6th FEBRUARY 2026**

“Digital Platforms under AYUSH Grid”

***118: Smt. D K Aruna:**

Shri Ashok Kumar Rawat:

Will the Minister of AYUSH be pleased to state:

- (a) whether the digital platforms developed under the AYUSH Grid including the My AYUSH Integrated Services Portal (MAISP), Showcasing of Ayurvedic Historical Imprints (SAHI) and the AYUSH Research Portal have led to measurable improvements in service delivery, transparency, research integration and overall governance in the AYUSH sector;
- (b) if so, the details thereof;
- (c) the nature of such improvements, the key performance indicators achieved and the extent of adoption and integration of these platforms by various State Governments, National Institutes, Research Councils, Educational Institutions and healthcare facilities;
- (d) the extent to which the implementation of the AYUSH Grid has improved or enhanced access to AYUSH-based primary healthcare services, tele-consultation, research data and patient-centric services, particularly in rural, tribal and aspirational districts across the country, State/UT-wise; and
- (e) the steps taken by the Government to address regional and digital disparities for its effective utilization?

ANSWER

**THE MINISTER OF STATE (IC) OF THE MINISTRY OF AYUSH
(SHRI PRATAPRAO JADHAV)**

- (a) to (e) A Statement is laid on the Table of the House.

The Statement referred in reply to Lok Sabha Starred Question No. 118 for 6.02.2026

(a) to (c) The Ayush Grid project, launched by the Ministry of Ayush, has been envisaged as a comprehensive IT backbone for the Ayush sector with the objective of digitizing service delivery and strengthening transparency, efficiency and governance across healthcare, research, education, drug administration, capacity building and medicinal plants.

Under this initiative, several digital platforms, including the My Ayush Integrated Services Portal (MAISP), and the Ayush Research Portal, have been developed and made accessible online across the country. These platforms have contributed to measurable improvements by enabling standardized digital processes, real-time data availability, wider public access to authentic information, and improved coordination among institutions.

MAISP is the master digital platform of the Ministry of Ayush, integrating all Ayush-related digital initiatives into a unified ecosystem. It enables citizen-centric access to services and schemes, supports real-time monitoring and data-driven decision-making, and promotes transparency, interoperability, and efficient governance across healthcare, education, research, medicinal plants, and global outreach.

The Showcasing of Ayurvedic Historical Imprints (SAHI) portal provides a transparent and authenticated digital repository of validated primary evidence of Ayurvedic practice in the Indian subcontinent and its global spread. It hosts inscriptional evidence, artefacts such as surgical instruments, medicine manufacturing tools, hospital setups, and archaeo-botanical information, thereby strengthening historical documentation and access to credible sources.

The Ayush Research Portal strengthens evidence-based practice by providing a centralized digital platform for dissemination of curated Ayush-based published research articles, hosting over 43,000 research studies and facilitating easy access for researchers, practitioners, and policymakers.

These digital systems are implemented nationwide, and users across all State Governments, National Institutes, Research Councils, Educational Institutions and healthcare facilities are utilizing these Ayush Grid platforms and services.

(d) and (e) The Ayush Grid has improved access to Ayush-based primary healthcare, tele-consultation, research data and patient-centric services in rural and aspirational districts, by strengthening digital infrastructure, capacity building and standardizing service delivery. Through platforms such as the Ayush Hospital Management Information System (A-HMIS) and integration with the Ayushman Bharat Digital Mission (ABDM), patient registration, electronic health records, referrals and continuity of care are being enabled digitally. Real-time dashboards and standardized reporting further support monitoring, planning and targeted interventions by State and district authorities, thereby enhancing availability and accessibility of Ayush services in such areas.
