MINISTRY OF ROAD TRANSPORT AND HIGHWAYS**

**LOK SABHA
UNSTARRED QUESTION NO. 4586
ANSWERED ON 19th MARCH, 2026**

MAJOR DEFICIENCIES ON NATIONAL HIGHWAYS

4586. MD ABU TAHER KHAN:

Will the Minister of ROAD TRANSPORT AND HIGHWAYS

सड़क परिवहन और राजमार्ग मंत्री

be pleased to state:

(a) whether the Government has recorded major deficiencies on National Highways since 2019 including design flaws, poor road conditions, inadequate signage and safety gaps, if so, the details thereof, year-wise and State-wise;

(b) whether only about one-third of identified accident-prone black spots on National Highways have been rectified during this period and if so, the reasons for the delay in fixing all the black spots; and

(c) whether the Government has assessed the impact of these deficiencies and unrectified black spots on road accidents fatalities and injuries and the corrective measures taken or proposed along with timelines to ensure safer National Highways across the country and if so, the details thereof?

ANSWER

**THE MINISTER OF ROAD TRANSPORT AND HIGHWAYS
(SHRI NITIN JAIRAM GADKARI)**

(a) to (c) As per information provided by the executing agencies of the National Highways(NHs), since 2019 major deficiencies in NH stretches have been reported for 96 projects / stretches. State / Union

Territory (UT) – wise details of major deficiencies on NH stretches observed since 2019 along with status of its rectification works and action taken against contractors, concessionaires, consultants etc. are annexed. Actions against defaulting agencies have been taken up as per the provisions of the Contract/ Concession agreement in cases of deficiencies/ damages, such as termination of contract agreement, levying of penalties/ liquidated damages, debarment/ blacklisting, declaring as non-performers etc.

Remedial work to repair or reconstruct damages during construction or in the Defect Liability Period (DLP) is the responsibility of the Contractor/ Concessionaire at their own cost as per provisions of contract agreement except in those cases where the Contract Agreement has been terminated in which case the securities provided are forfeited.

Road accidents have many causes and are often the result of interplay of various factors like human error, road environment and vehicular condition.

Rectification of black spots is a continuous process and temporary measures are taken on immediate basis. Government has taken steps for immediate short-term measures on black spots like road markings, signages, crash barriers, road studs, delineators, closure of unauthorized median openings, traffic calming measures, etc.

Out of total 16,542 blackspots identified on National Highways (NHs) in the country, short-term rectification has been completed on 14,138 black spots.

Long-term rectification measures, as recommended by road safety audit reports, are implemented only at locations deemed necessary. Further, long term rectification works includes improvement of road geometric, junction improvements, spot widening of carriageway, construction of underpasses/overpasses, etc. which involve pre-construction activities such as land acquisition, forest

clearance and utility shifting which takes significant time. Accordingly, long-term measures have been completed at 6,649 black spots, while 4,077 black spots have been assessed as not requiring such long-term interventions.

Generally, it is observed that rectification measures contribute to reduction in the rate of accidents.

ANNEXURE REFERRED TO IN REPLY TO PART (a) TO (c) OF LOK SABHA UNSTARRED QUESTION NO. 4586 ANSWERED ON 19TH MARCH, 2026 ASKED BY MD ABU TAHER KHAN REGARDING MAJOR DEFICIENCIES ON NATIONAL HIGHWAYS
