GOVERNMENT OF INDIA
MINISTRY OF RURAL DEVELOPMENT
DEPARTMENT OF RURAL DEVELOPMENT

LOK SABHA
UNSTARRED QUESTION NO. 552
ANSWERED ON 03/02/2026

DISHA DASHBOARD

552. Shri ArvindDharmapuri:

Will the Minister of RURAL DEVELOPMENT be pleased to state:

(a) the objectives and operational features of the District Development Coordination and Monitoring Committee (DISHA) dashboard and the extent to which it enables real-time monitoring and corrective action;

(b) the number of States and districts integrated and the frequency of alerts and exception reporting generated;

(c) the number of corrective actions taken based on dashboard insights and the outcomes achieved; and

(d) whether the Ministry has observed measurable service delivery improvements compared to the pre-dashboard period and if so, the details thereof?

ANSWER
MINISTER OF STATE IN THE MINISTRY OF RURAL DEVELOPMENT
(SHRI KAMLESH PASWAN)

(a): District Development Coordination And Monitoring Committee (DISHA) were constituted in June 2016 under the Chairmanship of Hon'ble Members of Parliament with a view to fulfil the objective of ensuring better coordination among all the elected representatives in Parliament, State Legislatures and Local Governments (Panchayati Raj Institutions, Municipal Bodies) for efficient and time bound development of districts of our country. These Committees are entrusted with monitoring the progress of programmes/ schemes of Central Government to promote synergy and convergence for greater impact. To facilitate the DISHA Committees, DISHA Dashboard was launched on 11th October 2017 as a centralized platform for information related to Central

Government schemes/ programmes administered by various Ministries/Departments.

The DISHA dashboard provides a user-friendly interface to stakeholders, state and district level DISHA committees for viewing progress in implementation of schemes through data, graphs along with time series data for tracking schemes' performance over time. The DISHA Dashboard supports evidence-based discussions during DISHA meetings by providing updated information on scheme coverage, financial progress and physical outcomes. The Dashboard also includes "Meeting Reporting Module" for uploading Notices, Agenda, Minutes of Meetings and Action Taken Reports, thereby enabling structured follow-up and accountability.

(b): The DISHA dashboard integrates 101 schemes of 35 Ministries/ Departments making available scheme related information at state/ district/ block/ gram-panchayat/ village levels across the country, depending upon the availability of data from concerned Ministries. The Dashboard does not generate periodic alerts or exception reports. However, it provides continuous access to updated information on key performance indicators of schemes, facilitates identification of bottlenecks, delays, gaps etc. and taking of corrective actions wherever required

(c) & (d): The integration of scheme data through the DISHA Dashboard enhances transparency in the implementation of Central Government schemes/ programmes and enables effective monitoring of physical and financial progress, including targets, achievements, and expenditure status. By providing access to historical data and trend analysis, it helps track performance and highlight areas requiring intervention, while also improving inter-departmental coordination and strengthening district-level monitoring. The dashboard supports more focused discussions during DISHA meetings, better follow-up through Action Taken Reports, and timely resolution of issues related to fund utilization and service delivery.
