

**GOVERNMENT OF INDIA  
MINISTRY OF HEALTH AND FAMILY WELFARE  
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**LOK SABHA  
STARRED QUESTION NO. 199  
TO BE ANSWERED ON THE 11<sup>TH</sup> DECEMBER 2015  
CASES OF DIABETES**

**†\*199. SHRI SHARAD TRIPATHI:**

**SHRI K.C. VENUGOPAL:**

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) whether the number of cases of diabetes including juvenile diabetes is on the rise in the country;
- (b) if so, the details thereof and the reasons therefor indicating the number of cases of diabetes and juvenile diabetes detected during each of the last three years and the current year, State/UT-wise;
- (c) whether the Government has conducted any study/survey in this regard, if so, the details and the outcome thereof;
- (d) whether the World Health Organization (WHO) and certain other international organizations have cautioned the Government against the sharp rise in the number of diabetic patients in the coming years, if so, the details thereof along with the reaction of the Government thereto; and
- (e) the action plan drawn by the Government for prevention, early detection and affordable treatment of diabetes including juvenile diabetes along with the funds allocated and utilized for the purpose during the above said period, State/UT-wise?

**ANSWER  
THE MINISTER OF HEALTH AND FAMILY WELFARE  
(SHRI JAGAT PRAKASH NADDA)**

(a) to (e): A statement is laid on the Table of the House

**STATEMENT REFERRED TO IN REPLY TO LOK SABHA  
STARRED QUESTION NO. 199\* FOR 11<sup>TH</sup> DECEMBER, 2015**

(a) to (c) : As per the information received from Indian Council of Medical Research (ICMR), there are no time trend data on incidence of diabetes mellitus among children indicating rise in the country. However, International Diabetes Federation (IDF) estimates the number of children ( 0-14 years) suffering from Type-1 Diabetes as 70,200 in India in 2015. For persons aged 20 years and above, the estimates are 66.8 million in 2014 as against 61.3 million persons in 2011.

The Indian Council of Medical Research has completed the phase I of project entitled, “ICMR-India Diabetes (INDIAB) Study,” with the aim to:

- I. determine the national prevalence of type 2 Diabetes mellitus and pre-Diabetes in India, by estimating the state-wise prevalence of the same, and
- II. compare the prevalence of type-2 Diabetes and pre-Diabetes in urban and rural areas across India.

In the first phase of the study, the rural and urban settings in four states and one union territory viz., Tamil Nadu, Jharkhand, Maharashtra and Chandigarh have been included. The adjusted prevalence of Diabetes (both known and newly diagnosed) in Tamil Nadu was 10.4 %, Jharkhand-5.3%, Chandigarh-13.6% and Maharashtra-8.4%. The prevalence of pre-diabetes was 8.3%, 8.1%, 14.6% and 12.8 % respectively.

A statement showing State/UT-wise number of cases detected for Diabetes during 2014-15 and 2015-16 (Till October 2015) under the National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS) is enclosed at Annexure-I.

Data on number of cases detected for Juvenile Diabetes is not routinely collected centrally. However, data reported during the course of screening of school children under National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke during 2010-2013, indicates that out of 92,047 school children screened in the towns of Nainital, Ratlam, and Bhilwara, 1,351 (1.467%) were suspected to be Diabetic.

The factors responsible for increase in Diabetes are unhealthy diet, lack of physical activity, harmful use of alcohol, over-weight, obesity, tobacco use etc.

(d) & (e) : International Diabetes Federation Diabetes Atlas, 6<sup>th</sup> edition – 2013 indicate that “Diabetes is growing alarmingly in India”. Government of India had taken cognisance of this report.

In line with WHO’s comprehensive Global Monitoring Framework and Action Plan for prevention and Control of Non-Communicable Diseases (NCDs) (2013-2020), endorsed by the 66th World Health Assembly (WHA) in May 2013, India is the first country globally to adopt the NCD Global Monitoring Framework and Action Plan to its National Context. In the National Action Plan and Monitoring Framework for prevention and control of NCDs, Diabetes has been identified as one of the areas of intervention.

While Health is a State subject, the Central Government supplements the efforts of the State Governments for improving healthcare. Government of India has launched National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS) which is implemented for interventions up to District level under the National Health Mission. NPCDCS has a focus on awareness generation for behaviour and life-style changes, screening and early diagnosis of persons with high level of risk factors and their treatment/followup and referral (if required) to higher facilities for appropriate management for Non-Communicable Diseases including Diabetes.

Under NPCDCS, diagnosis and treatment facilities for Diabetes are provided through different levels of healthcare by setting up NCD Clinics in District Hospitals and Community Health Centres (CHCs). The treatment is either free or highly subsidized for the poor and needy.

A Statement showing State/UT-wise release and utilisation of funds under NPCDCS for the last three years and the current year is at Annexure-II.

**Statement indicating State/UT wise number of Cases of Diabetes  
detected during 2014-15 and 2015-16 (till Oct. 2015)**
