

**GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**LOK SABHA
UNSTARRED QUESTION NO. 3336
TO BE ANSWERED ON 18TH DECEMBER, 2015**

NEO-NATAL DEATHS

**3336. SHRI G. HARI:
SHRI RATTAN LAL KATARIA:**

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) whether reportedly 25 per cent of all neo-natal deaths in the world occur in India;
- (b) if so, the details thereof and the reasons therefor;
- (c) the number of neo-natal deaths reported during each of the last three years and the current year, State/UT-wise; and
- (d) the steps taken by the Government in this regard?

**ANSWER
THE MINISTER OF HEALTH AND FAMILY WELFARE
(SHRI JAGAT PRAKASH NADDA)**

- (a) & (b): Yes, as per United Nations Inter-agency estimates, 2013, India accounts for more than quarter of all neonatal deaths in the world. The main causes for neonatal deaths are prematurity, birth asphyxia and sepsis.
- (c): As per Sample registration System (SRS) the reported Neonatal Mortality Rate (NMR) of the last three years and the current year, state/UT- wise is placed at annexure.
- (d): Under the National Health Mission, the following key interventions are implemented all over the country to bring down the neonatal mortality:
 - 1. Promoting Institutional delivery through Janani Suraksha Yojna (JSY), a cash incentive scheme for pregnant mothers and Janani Shishu Suraksha Karyakaram (JSSK) which entitles all pregnant women and sick infant to absolutely free and no expense treatment at the public health facilities.
 - 2. Strengthening of delivery points by identifying the “delivery points” for providing comprehensive and quality RMNCH Services at those health facilities.

Contd.....

3. Strengthening of newborn care services by establishing facilities for care of Sick Newborn such as Special New Born Care Units (SNCUs), New Born Stabilization Units (NBSUs) and New Born Care Corners (NBCCs) and provision of Home based new born care (HBNC) through ASHAs. Guidelines for Use of Antenatal Corticosteroids in preterm labour and Kangaroo Mother care and Optimal feeding in Low birth weight infants for the management of preterm babies have been disseminated to the states.
4. Various trainings in the form of Facility Based Newborn Care (FBNC) training to provide comprehensive care to the sick babies and Navjat Shishu Suraksha Karyakaram (NSSK) to provide essential newborn care is being imparted to medical officers and nurses to build their capacity.
5. Prevention and treatment of Anaemia by supplementation with Iron and Folic Acid tablets during pregnancy and lactation.
6. Name Based Tracking of Pregnant Women to ensure complete antenatal, intranatal, postnatal care and children up to 2 years of age for completing immunization as per UIP schedule.
7. Village Health and Nutrition Days in rural areas as an outreach activity, for provision of maternal and child health services and creating awareness on maternal and child care including health and nutrition education.
8. As breastfeeding reduces infant mortality, early initiation and exclusive breastfeeding for first six months and appropriate infant and young child feeding practices are promoted in convergence with Ministry of Woman and Child Development.
9. To sharpen the focus on vulnerable and marginalized populations in underserved areas, 184 High Priority Districts have been identified for intensification of Reproductive Maternal Newborn Child Health+ Adolescent (RMNCH+A) interventions for achieving improved maternal and child health outcomes.
