

**GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**LOK SABHA
UNSTARRED QUESTION NO.3405
TO BE ANSWERED ON 18TH DECEMBER, 2015**

CANCER PREVENTION AND CONTROL

**3405. SHRI RAJESH RANJAN:
SHRI KAUSHALENDRA KUMAR:
SHRI ADHALRAO PATIL SHIVAJIRAO:
SHRIMATI RAKSHATAI KHADSE:
DR. SANJAY JAISWAL:
SHRI DHARMENDRA YADAV:
SHRI SHRIRANG APPA BARNE:
SHRI GODSE HEMANT TUKARAM:
SHRI ANANDRAO ADSUL:
SHRI S.R. VIJAYAKUMAR:**

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) whether the World Health Organisation's (WHO) South East Asia regional committee meet has suggested prioritizing cancer prevention and control programmes to deal with the rising number of cancer cases, if so, the details thereof and the follow up action taken by the Government thereon;
- (b) whether the said meet has highlighted that at least one-third of cancers can be prevented by implementing various intervention programmes, if so, the details thereof along with the measures taken/ proposed to be taken by the Government in this regard;
- (c) whether the Government proposes to set up new cancer care centres/institutes and hospitals including under Public Private Partnership (PPP) in the country and if so, the details thereof indicating the expenditure likely to be incurred thereon, State/UT-wise; and
- (d) the steps taken/proposed to be taken by the Government to promote research projects relating to cancer treatment and setting up research institutes for the purpose?

**ANSWER
THE MINISTER OF HEALTH AND FAMILY WELFARE
(SHRI JAGAT PRAKASH NADDA)**

(a) to (c): The WHO South East Asia Regional Committee, in its 68th session held in Timor Leste, adopted resolution no. SEA/RC68/R5 on 11 September 2015, on “Cancer Prevention and Control – the way forward”. The said resolution noted that many cancers are preventable, can be detected early and treated, which improves survival and quality of life. It urged the Member States, inter-alia, to develop/strengthen a comprehensive national cancer prevention and control programme, integrated within a broader multisectoral NCD action plan, with time-bound benchmarks and targets, effective governance and accountability, adequate and sustainable financing for programme implementation, monitoring and evaluation.

India has prepared and adopted a National Action Plan and Monitoring Framework for Non Communicable Diseases with 10 targets and 21 indicators.

Since adopting WHO Framework Convention on Tobacco Control (FCTC), the Government of India launched National Tobacco Control program in 2007-08 with the aim to create awareness about the harmful effects of tobacco consumption, reduce the demand and supply of tobacco products, ensure effective implementation of the provisions under “The Cigarettes and Other Tobacco Products (Prohibition of Advertisement and Regulation of Trade and Commerce, Production, Supply and Distribution) Act, 2003” (COTPA) and help people quit tobacco use through Tobacco Cessation Centres.

Central Government supplements the efforts of the State Government for improving healthcare including prevention, diagnosis and treatment of Cancer. At present, National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS) being implemented under National Health Mission (NHM) for interventions upto the district level includes awareness generation for Cancer prevention, screening, early detection and referral to an appropriate level institution for treatment. The focus is on three areas namely breast, cervical and oral Cancer. Screening guidelines have been provided to State Governments for implementation. Suspected cases are to be referred for confirmatory diagnosis by various tests including histo-pathological biopsy.

Government of India is also implementing a scheme for enhancing the tertiary care facilities for Cancer in the country. Under the said scheme, Government of India will assist to set up/establish 20 State Cancer Institutes (SCI) and 50 Tertiary Care Cancer Centres (TCCC) in different parts of the country. The maximum assistance inclusive of State share for SCI is upto Rs. 120 crores and for TCCC is upto Rs. 45 crores. The Central and State share is in the ratio 75:25 while for North East and Hill States this ratio is 90:10.

(d): In the Government sector, Research activities for detection and treatment of cancer are mostly carried out by Institutions/Departments such as the Indian Council of Medical Research, Department of Science and Technology and Department of Atomic Energy. The Bhabha Atomic Research Centre has developed Bhabhatron and the Society for Applied Microwave Electronics Engineering and Research (SAMEER) has developed Linear Accelerator (LINAC).

The Indian Council of Medical Research is promoting cancer research including epidemiological, clinical, basic and translational research. The ICMR has also developed protocols for the management (including treatment) of Buccal Mucosa Cancer, Gall Bladder Cancer, Stomach Cancer, Colorectal Cancer, and Tongue Cancer. Institute of Cytology and Preventive Oncology under the Indian Council of Medical Research has developed a hand held device called Magnivisualizer with inbuilt source of light that can be used in field conditions for early detection of cervical cancer and oral cancer lesions.
