GOVERNMENT OF INDIA MINISTRY OF HEALTH AND FAMILY WELFARE DEPARTMENT OF HEALTH AND FAMILY WELFARE

LOK SABHA UNSTARRED QUESTION NO. 2323 TO BE ANSWERED ON 11TH MARCH, 2016

DEFICIENCY OF VITAMIN-D

2323. SHRI P. NAGARAJAN:

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

(a) whether around 80 percent people in Urban India suffer from Vitamin-D deficiency and 90 percent people suffer from damaged knees joint in the age group of 60-65 years; and

(b) if so, the corrective measures taken in this regard?

ANSWER THE MINISTER OF HEALTH AND FAMILY WELFARE (SHRI JAGAT PRAKASH NADDA)

(a): The surveys carried out in India indicate that despite ample sunlight, people are deficient in Vitamin D. The prevalence of Vitamin D deficiency is in the range of 10 percent to over 90 percent across all age groups. The studies have also shown that Vitamin D deficiency may be associated with low bone mineral density leading to weaker bones and fracture risk.

(b): While health is a State subject, the Central Government supplements the activities and efforts of the States towards creation of awareness, health education, health promotion, and diagnosis/treatment facilities.
