(c) The import and export of agricultural products depends on various factors including availability of surplus over and above the requirement of buffer stock including

strategic reserve, concerns of food security, diplomatic/humanitarian considerations, international demand and supply situation, quality standards in the importing/exporting countries, varieties traded and price competitiveness, need to balance between remunerative prices to the growers and availability of agricultural products to common man at affordable prices. The Government takes into account the above factors before deciding on import or export of agricultural commodities. However, no import has been made to the Government account during the year 2015-16.
