

**GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**LOK SABHA
UNSTARRED QUESTION NO. 979
TO BE ANSWERED ON 22ND JULY, 2016**

DISEASES AMONG CHILDREN

979. SHRIMATI RANJANBEN BHATT:

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

(a) whether the Government proposes to formulate a plan/formulated a plan to protect and prevent occurrence of diseases among children; and

(b) if so, the details thereof along with the steps taken by the Government in this regard?

**ANSWER
THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND
FAMILY WELFARE
(SHRI FAGGAN SINGH KULASTE)**

(a) & (b): Yes. Under National Health Mission (NHM) various child health related interventions are being implemented to protect and prevent occurrence of diseases among children. These interventions are as follows:

- i. Promotion of Institutional deliveries through cash incentive under Janani Suraksha Yojana (JSY) and Janani Shishu Suraksha Karyakram (JSSK) which entitles all pregnant women delivering in public health institutions to absolutely free and no expense ante-natal check-ups, delivery including Caesarean section, post-natal care and treatment of sick infants till one year of age.
- ii. Strengthening of delivery points for providing comprehensive and quality Reproductive, maternal, newborn, Child and Adolescent Health (RMNCH+A) Services, ensuring essential newborn care at all delivery points, establishment of Special Newborn Care Units (SNCU), Newborn Stabilization Units (NBSU) and Kangaroo Mother Care (KMC) units for care of sick and small babies.
- iii. Early initiation and exclusive breastfeeding for first six months and appropriate Infant and Young Child Feeding (IYCF) practices are promoted in convergence with Ministry of Women and Child Development. Village Health and Nutrition Days (VHNDs) are observed for provision of maternal and child health services and creating awareness on maternal and child care including health and nutrition education.

- iv. Treatment of sick children with severe acute malnutrition at special units called the Nutrition Rehabilitation Centres (NRCs), set up at public health facilities. Presently 960 such centres are functional across the country.
- v. Universal Immunization Programme (UIP) is being supported to provide vaccination to children against many life threatening diseases such as Diphtheria, Pertussis, Tetanus, Poliomyelitis, Tuberculosis, Measles, Hepatitis B, Meningitis and Pneumonia due to Haemophilus Influenzae type B. In addition, vaccination against Japanese Encephalitis is carried out in endemic districts and vaccination against Rotavirus diarrhoea is provided in four states (Odisha, Himachal Pradesh, Haryana and Andhra Pradesh).
- vi. Name based tracking of mothers and children till two years of age is done to ensure complete antenatal, intranatal, postnatal care and complete immunization as per schedule.
- vii. Rashtriya Bal Swasthya Karyakram (RBSK) for health screening, early detection of birth defects, diseases, deficiencies, development delays including disability and early intervention services has been operationalized to provide comprehensive care to all the children in the age group of 0-18 years.
- viii. Some other important interventions are Iron and folic acid (IFA) supplementation for the prevention of anaemia among the vulnerable age groups, annual deworming on National Deworming Day (NDD), home visitation by ASHAs to promote exclusive breast feeding and early detection and referral of sick newborns and promoting the use of ORS and Zinc for management of diarrhoea in children.
- ix. To sharpen the focus on the low performing districts, 184 High Priority Districts (HPDs) have been prioritized for Reproductive Maternal Newborn Child Health+ Adolescent (RMNCH+A) interventions for achieving improved maternal and child health outcomes.
