

**GOVERNMENT OF INDIA
MINISTRY OF AYUSH
LOK SABHA
UNSTARRED QUESTION NO. 1009
TO BE ANSWERED ON 24/07/2026**

“Digital Initiatives and AYUSH Grid”

1009. **Smt. Himadri Singh:**
Shri Ananta Nayak:
Shri Chavda Vinod Lakhamshi:
Shri Ashok Kumar Rawat:
Shri Naba Charan Majhi:
Shri Avimanyu Sethi:
Shri Vishnu Dayal Ram:
Shri Rajpalsinh Mahendrasinh Jadav:

Will the Minister of AYUSH be pleased to state:

- (a) the progress made under the AYUSH Grid and various digital platforms including the My AYUSH Integrated Services Portal (MAISP) and other e-governance initiatives;
- (b) the extent of adoption of the AYUSH Grid by States, Union Territories and AYUSH healthcare institutions, particularly in rural, aspirational and tribal districts including the Keonjhar Parliamentary Constituency of Odisha;
- (c) whether the Government has undertaken any initiatives for the digital strengthening of AYUSH hospitals, dispensaries, wellness centres and telemedicine services in the Keonjhar Parliamentary Constituency and if so, the details thereof; and
- (d) the future roadmap for the digital transformation of the AYUSH Grid including its integration with other National health programmes and expansion of digital healthcare services in underserved regions of the country?

ANSWER

**THE MINISTER OF STATE (IC) OF THE MINISTRY OF AYUSH
(SHRI PRATAPRAO JADHAV)**

- (a)** The Ayush Grid project serves as the IT backbone of the Ayush sector, driving digital transformation across healthcare, research & development, Ayush drug administration, medicinal plants, education & awareness, capacity building and global/media outreach.

Under this initiative, twenty-four e-governance platforms have been developed and made accessible across the country. The My Ayush Integrated Services Portal (MAISP), the master portal of the Ministry of Ayush available at <https://www.maisp.ayush.gov.in>, integrates all Ayush-related applications and services into a unified digital ecosystem. An AI-enabled chatbot (Beta version) has also been deployed to assist visitors and enhance user experience. The portal facilitates citizen-centric access to various services and schemes and enables real-time monitoring and data-driven decision-making. (Details available at: [maisp.ayush.gov.in](https://www.maisp.ayush.gov.in))

Similarly, the Ayushman Bharat Digital Mission (ABDM)-compliant Ayush Hospital Management Information System (AHMIS) has been deployed to digitize healthcare delivery and improve the management of Ayush health facilities. The Ayush Anudan Portal has streamlined the submission, processing, approval, and monitoring of funding proposals under various Central Sector Schemes of the Ministry. The Ayush Research Portal serves as a centralized digital repository of over 43,000 curated Ayush research publications, facilitating easy access for researchers, practitioners, and policymakers. The Ayush Nivesh Saarthi Portal serves as a dedicated gateway for domestic and international investors in the Ayush sector, providing comprehensive information to promote investment opportunities. The e-Charak portal functions as a virtual marketplace and information platform for the medicinal plants sector, connecting farmers, collectors, buyers, manufacturers, and exporters.

The Y-Break Pro mobile application promotes holistic well-being in workplaces through short Yoga sessions. The mYoga application encourages regular Yoga practice by providing learning modules and guided sessions that can be accessed anytime and anywhere. The Yoga Portal serves as a dedicated digital platform for promoting Yoga as a holistic lifestyle practice and enhancing its accessibility to all. It provides authentic and structured information on Yoga protocols, training modules, certified institutions, events, and research studies, ensuring credibility and ease of access for learners and practitioners.

Further, Yoga Sangam, hosted on the Yoga Portal during the International Day of Yoga (IDY) 2026, witnessed the registration of over 7.6 lakh organizations, which uploaded over 8 lakh photographs of people performing Yoga simultaneously across the country.

Collectively, all e-governance tools developed under the Ayush Grid are accessible to everyone and have strengthened service delivery, improved operational efficiency, and enhanced transparency and accountability.

(b) The Ayush Grid has improved access to Ayush-based primary healthcare, including in rural and aspirational districts, by strengthening digital infrastructure and standardizing service delivery.

Through platforms such as the Ayush Hospital Management Information System (A-HMIS), patient registration, electronic health records, referrals and continuity of care are being enabled digitally. As on 15 July 2026, a total of 5,386 Ayush health facilities across the country have been onboarded onto AHMIS. Regional Research Institute in Unani Medicine, Regional Research Institute in Homoeopathy and Central Ayurveda Research Institute have on-boarded on AHMIS application in Odisha. Real-time dashboards and standardized reporting further support monitoring, planning and targeted interventions by State and District authorities, thereby enhancing availability and accessibility of Ayush services in such areas.

Further, the PM GatiShakti portal has enabled GIS mapping of Ayush health facilities using PM Gatishakti Ayush Asset Mapping Tool to support planning and decision-making. As on 15 July 2026, a total of 6,002 facilities have been mapped on the portal among which 85 Standalone Ayush dispensaries and 150 AAMs are from Odisha State. In Yoga Sangam hosted on Yoga Portal during International Day of Yoga 2026, 235 organizations have been registered under Keonjhar Parliamentary Constituency and 14890 organizations registered in Odisha.

The adoption of these digital platforms by Ayush healthcare institutions across States and Union Territories has enhanced the accessibility, quality, and continuity of Ayush services, including rural and aspirational districts.

(c) My Ayush Integrated Services Portal (MAISP), the master portal of the Ministry of Ayush, integrates all Ayush-related applications and services into a unified digital ecosystem. All portals developed under Ayush Grid project is accessible to all users including in Keonjhar Parliamentary Constituency of Odisha. Further, AHMIS application has been developed for digital strengthening of AYUSH hospitals, dispensaries, wellness centers etc. throughout India. Using AHMIS application, patients can book online appointments and directly visit the facility without waiting in queue. Digital maintenance of the medicines' stock is being done through AHMIS application.

(d) Ministry of Ayush is strengthening the Ayush Grid as a comprehensive digital ecosystem for the Ayush sector by enhancing digital platforms, promoting interoperability, adopting emerging technologies like Artificial Intelligence and Machine Learning, and enabling data-driven governance.

These efforts are aimed at improving service delivery, facilitating evidence-based policymaking, providing multilingual support in convergence with Digital India BHASHINI Division (DIBD) under Ministry of Electronics and Information Technology (MeitY), and ensuring seamless integration with national health programmes and digital health initiatives, including the Ayushman Bharat Digital Mission (ABDM).
