- (e) whether the NCS portal uses Artificial Intelligence, metadata and other advanced technologies to improve job matching and employment outcomes and if so, the details thereof?**

ANSWER

**MINISTER OF STATE FOR LABOUR AND EMPLOYMENT
(SUSHRI SHOBHA KARANDLAJE)**

(a) to (e): The National Career Service (NCS) Portal is a one-stop solution for providing career related services including jobs from private and government sectors, information on online & offline job fairs, job search & matching, career counselling, vocational guidance, information on skill development courses, skill/training programmes etc. through a digital platform [www.ncs.gov.in] to all stakeholders across the country.

NCS has been upgraded to cloud-based, open architecture which enables skill providers, other private portals, start-ups, ed-techs, HR-tech companies, local enterprises, etc. to build their own applications, services, and solutions using open APIs, open standards, and interoperable protocols of NCS portal.

The NCS project also inter alia, envisaged setting up of Model Career Centres (MCCs) in collaboration with States/Institutions to deliver career related services. Till date the Government has approved 407 Model Career Centres across the country. State/UT-wise details of the number of Model Career Centres including in the State of Rajasthan may be seen https://www.ncs.gov.in/User_Manuals/List_of_Model_Career_Centers.pdf

The State/UT-wise and district-wise details of jobseeker and employer registered, and number of vacancies mobilized on NCS portal (including through MCCs) across the country may be seen at https://www.ncs.gov.in/_layouts/15/ncsp/ViewStaticReport.aspx

Further, NCS portal provides AI-enabled features like intelligent job matching, AI skill gap analysis, personalized job recommendations, AI interview coach, multilingual support through Bhasini, etc.
